CLAIM 53 NAZI PLANES DOWNED

NAZI HIGH COMMAND CLAIM 34 BRITISH PLANES SHOT DOWN

ALSO SAY A DOZEN SHIPS TOTALLING 55,000 TONS SUNK ON THURSDAY

BERLIN, Aug. 8.—(AP)—The German high command announced in a special bulletin today that 34 British planes had been shot down and 12 ships totaling 55,000 tons had been sunk today.

In addition, the high command said, a tanker of 8,000 tons and two steamers totalling 9,000 tons were sunk by speedboats last night.

Twelve ships went down during an attack of the German air force on a convoy in the Channel this morning, the announcement said.

Seven other ships were damaged in this raid, the high command claimed, and five British fighting planes were shot down.

Twenty-nine other British planes were shot down in other fighting in the Channel area, the communique said, adding that three German planes were reported missing.

In its earlier regular communique the Nazi command said the German air force had mined several English harbors last night and attacked a number of armament works, searchlight and anti-aircraft positions."

The communique said motor works in Leyland, the Vickers-Armstrong plant at Chester, airplane works at Yeovil and industrial plants at Plymouth were targets of bombers. It listed British defense positions at Manchester, Cardiff, Dorchester and Plymouth as additional objectives.

British raids over North and Western Germany last night were said to have been carried out "without causing much dam-

HURRICANE BLEW ITSELF OUT AFTER PASSING INTO TEXAS

ONE DEAD, TEN INJURED AND CONSIDERABLE DAMAGE DONE TO PROPERTY

PORT ARTHUR, Aug. 8.—(AP)—A tropical hurricane today breathed its last in gusty squalls along the southeast Texas coast, while the Sabine area rushed repair of widespread damage unofficially estimated as high as $1,000,000.

The United States Weather Bureau at New Orleans ordered small craft warnings displayed in Galveston, Lake Charles, La., and Port Arthur, because of strong winds and southerly gales that were expected to mark the dying moments of the tropical tempest that battered this area with 90-mile-an-hour winds.

At Lake Charles, an emergency call for food and medical aid was received by short wave radio from isolated Cameron, La., where 300 persons are marooned in the court house by tides six feet above normal. The message did not give particulars, but said the food supply was nearly exhausted.

A government engineers' launch with a physician and food was en route to the coastal fishing village where the fury of the storm was first felt yesterday.

The hurricane was blowing itself

MEMBERS JAPANESE DIET URGE DRIVING BRITISH OUT ORIENT

FOREIGN SOURCES INDICATE JAP ARMY AND NAVY PLAN SOUTHWARD DRIVE

TOKYO, Aug. 8.—(AP)—One hundred and 26 members of the diet (parliament) adopted a resolution today urging the government to take "all available and effective measures to drive British influence from East Asia."

Britain's arrest of prominent Japanese business men in her empire were declared "purely retaliatory" and "unpardonably atrocious" acts.

There are 466 members in the Japanese diet.

SHANGHAI, Aug. 8.—(AP)—Trustworthy foreign sources said today the Japanese army and navy is speeding preparations for further moves southward, in the direction of French Indo-China and the Dutch East Indies.

A lightning Japanese thrust, these informants predicted, would be timed to coincide with any attempt by Adolf Hitler to start his long-threatened invasion of England.

In the event Hitler failed to move, it was believed Japan would

Battles Nazis In Air

Arthur Donahue (above), Laredo, Texas, who joined the British Royal Air force because he "wanted to do something more than just teach other people to fly" was credited by the RAF with the "probable" destruction of a German plane in a dog fight over the English channel.

ITALIAN OCCUPATION BRITISH SOMALILAND PORT IS REPORTED

MOVE UNDER WAY TO JOIN BRITISH, FRENCH SOMALILAND WITH ITALIAN

ROME, Aug. 8.—(AP)—Italian occupation of Zeila, westernmost port in British Somaliland, is the first step in a move by the Italians to join British and French Somaliland with Italian Somaliland in the African offensive now under way, a high fascist authority indicated today.

(British sources in London said today Britain might give Italy a "cheap victory" in British Somaliland by withdrawing her forces from desert wastes considered not worth defending.)

The capture of Zeila described officially as of great strategic importance, was announced in today's high command communique, which said Zeila had been taken after a three-day march from Ethiopia, 50 miles from Zeila at the nearest point.

(The British announced loss of Zeila yesterday.)

Zeila, and Berbera, capital of British Somaliland and largest port in the protectorate, are natural outlets to the Gulf of Aden—

Six Dead, Nine Seriously Hurt Gasoline Blast

LAS VEGAS, Nev., Aug. 9.—(AP)—Six dead were identified today as physicians fought to save the lives of nine other victims of a gasoline explosion which rocked a residential district here.

Five of the dead were the wife and four children of Thomas Myers, gasoline distributor, and the other was a neighbor child.

Myers and two more of his children are among the most critically injured. Only member of the household unhurt was a son, Gay, asleep in a front bedroom some distance from the Myers back yard, where the blast occurred.

Myers said he was pouring gasoline from truck tanks into small containers when suddenly a "solid sheet of flame shot out in four directions." The explosion shook adjoining houses and broke windows half a mile away.

INDIA IS PROMISED EQUAL PARTNERSHIP IN COMMONWEALTH

BRITAIN SEEKS TO UNIFY EMPIRE'S GREATEST POSSESSION AGAINST AXIS

LONDON, Aug. 8.—(AP)—Britain, seeking fuller use of India's vast wealth and manpower for the fight to maintain her empire intact, today promised India "free and equal partnership" in the British commonwealth after the war.

The pledge, interpreted as going beyond Britain's previous proposal for post-war dominion status for India, came as Italian columns drove toward new outlets on the Indian ocean along Britain's lifeline of empire.

A government statement said the present, "when the Commonwealth is engaged in a struggle "fundamental constitutional" chan for existence," is not the time for "fundamental constitutional" changes. But it promised to let the Indians themselves "devise the framework of a new constitution" after the war.

The pledge, announced by L. S. Amery, British Secretary of State for India, in the House of Commons, was authoritatively interpreted as offering an "even broader" status than that of dominion, which is enjoyed by Canada, Australia and South Africa. Post-war dominion status for India was proposed by the government last October.

A similar statement was made simultaneously by Lord Linlithgow, Viceroy, in India.

Fullest "sympathy" was expressed for India insistence that the new constitution should be framed by Indians and ready "assent" was announced to organization, after the war, of a body representing the principal elements in Indian national life to devise a new constitution.

An invitation to Indian leaders to join the governor general's executive council and establishment of a war advisory council which would contain representatives of the Indian states also was announced.

The government statement frankly declared its hope that satisfaction of Indian nationalist aspirations would lead to a great-

RECOMMENDATIONS BE SUBMITTED PUBLIC HEARING ON BUDGET

COUNTY-WIDE TAX COMMITTEE DISCUSSED COUNTY FINANCES AT MEETING

Definite recommendations to be submitted at the public hearing on the Navarro county budget for the next fiscal year were adopted during a three-hour joint session of the county-wide tax committee and the tax committee of the Corsicana Chamber of Commerce held Thursday morning.

These included a recommendation that road bond refunds be used to pay off bonded indebtedness, provision be made for installation of a cost accounting system by the county auditor, that salary of the assistant county agent be assumed, and that all operations be carried out as economically and efficiently as possible.

The two committees also recommended that the commissioners' court be asked to set aside at least 40 per cent of the road and bridge fund for permanent improvements, and these improvements be carried out on a unit basis rather than scattered piecemeal over the four commissioners' precincts.

The committees also agreed unanimously to work with Navarro county legislators for amendments to the state salary law which re-

BRITAIN BIDS FOR FURTHER HELP FROM WEALTH OF INDIA

GERMAN AIR ATTACK BEATEN OFF; ITALY THREATENS COLONIAL EMPIRE

(By The Associated Press)

Britain bid today for further help from India's fabled wealth and vast manpower as Italy menaced the Empire's Mediterranean-Suez Canal-Red Sea lifeline and the RAF beat off a powerful Nazi air attack on English channel shipping.

"Free and equal partnership" in the British commonwealth was Britain's promise to her greatest Asiatic possession.

The British said the Nazis lost at least nine planes and the British themselves two as air fighting raged over the channel and the southeastern coast of England for an hour, filling the air with the roar of cannon and chatter of machine guns.

The announcement on the Indian situation, made simultaneously in commons and the house of lords and in India, said the government was willing to let Indians "devise the framework of a new constitution" at the end of the war in the hope that the distant country's 350,000,000 people, overcoming their own differences, would at last attain "freedom and equality within the British commonwealth" of nations. Britain herself, the statement said, was unwilling to undertake "fundamental constitutional issues" at time.

The British account of the air battle said at least fifty German bombers and a large number of escorts took part against only a dozen British fighting planes. Sometimes they swooped down to within a thousand feet of the rooftops or sea, rattling the windows of homes and shops. At other times the planes vanished high in the clouds.

Nazis Attack Channel Shipping

The fight opened with a German attack on channel shipping, a phase of nazi warfare intended to block off supplies from the embattled Britons.

Along the shore and far inland watchers thrilled. Once a German fighting plane, picked out of a bomber escort, spun swiftly in flames to the channel.

Six of the German planes lost were bombers, the others chasers and escort planes.

But even as Britons cheered this new evidence of growing power of the RAF, many were concerned with developments in that hot dry corner of northeast Africa where a British force, in the Kipling tradition, sought to block Italy's intended conquest of the continent.

British military authorities in London, conceding capture of Zeila in British Somaliland, expressed belief the fascists forces would have a tough time taking Berbera, principal port of the country, and connected with Zeila by a 150-mile motor road. An Italian advance along this road could

PRESIDENT SETS ASIDE SPECIAL DAY FOR PEACE PRAYERS

SUNDAY, SEPT. 8, WOULD BE DAY FOR ALL AMERICANS TO SEND UP PETITIONS

HYDE PARK, N. Y., Aug. 8.—(AP)—President Roosevelt has set aside Sunday, September 8, as a day of prayer when Americans of every creed and denomination should ask God "to grant to this land and to the troubled world a righteous, enduring peace."

"When every succeeding day brings sad news of suffering and disaster abroad," he said in a proclamation, "we are especially conscious of the divine power," and "it is seemly that we should" pray for God's blessing "on our country and for the establishment of a just and permanent peace' among all nations.

The proclamation, dated yesterday and made public today at the president's Hudson valley estate, said in part:

"The American heritage of individual freedom and of government deriving its power from the consent of the governed has from the time of the fathers of our republic been proudly transmitted to each succeeding generation, and to us of this generation has fallen the task of preserving it and transmitting it to the future. We are now engaged in a mighty effort to fortify that heritage. x x x

"I urge the people of the United States, of all creeds and denominations, to pray on that day, in their churches or at their homes, on the high seas or wherever they may be, beseeching the Ruler of the Universe to bless our republic, to make us reverently greatful for our heritage and firm in its defense, and to grant to this land and to the troubled world a righteous, enduring peace."

Rescue workers are shown at New Orleans as they were taking Mrs. Melisse Darda, 90, to high ground as storm tides threatened thousands of homes on the gulf coast.

FARLEY RESIGNS AS POSTAL DEPARTMENT HEAD ON THURSDAY

PRESIDENT ROOSEVELT EXPRESSES REAL REGRET AT RETIRING CABINET MEMBER

HYDE PARK, Aug. 8.—(AP)—President Roosevelt today accepted with "real regret" the resignation of James A. Farley as postmaster general, effective as of Aug. 31—about two weeks after Farley steps out of his post as national chairman of the Democratic party.

Farley resigned his political post after the Chicago convention, giving as his reason a desire to return to private life. There have been apparently well-founded reports that he would head a syndicate buying the New York Yankee baseball club.

Mr. Roosevelt's announcement Farley was leaving the cabinet preceded by only a few hours a conference the chief executive has scheduled with two other cabinet members—Secretaries Wallace and Hopkins.

In Chicago, where Farley indicated he was not too well acquainted with what was going on in the camp of the third term for Roosevelt adherents, Hopkins and Wallace were in the van of that activity.

Wallace emerged from the convention with the vice presidential nomination, and the conference today will give him an opportunity to talk over campaign strategy with the President.

Mr. Roosevelt dictated a letter to Farley, shortly before a scheduled conference with Secretaries Wallace and Hopkins, in which he said he accepted the resignation with "real regret," wished Farley success in private business and praised his administration of the post office department.

"All of us in the administration," the President wrote, "will miss you deeply; we count on seeing you often. I especially count on this after all of our years of close personal association. Our friendship will always continue."

Among reports of Farley's future activities is one that he would head a syndicate in purchasing the New York Yankee baseball property.

Farley said in his letter of resignation, dated yesterday, that he, too, felt sincere regret at tak-

Negro Arrested On Suspicion Is Found Be Attacker

HOUSTON, Aug. 8—(AP)—A 37-year old negro, arrested merely as a "suspicious character," was identified a few minutes later at the police station as the man who attacked a 24-year old Temple Terrace housewife.

The woman left the rear door of the home unlocked so her husband, who worked until 2 a. m., could get in. Shortly before that hour she was awakened by a noise and, thinking her husband had returned, called out.

At that, a large negro stepped to the side of the bed and grabbed her throat.

"He choked me, then warned

MYSTERY SURROUNDS CASE OF STEWARDESS ON AIRLINES SLEEPER

GIRL FOUND UNCONSCIOUS BAGGAGE COMPARTMENT AS PLANE NEARED NASHVILLE

NASHVILLE, Tenn., Aug. 8.—(AP)—American Airlines officials today quoted Stewardess Rosemary Griffith as saying she was hit on the head by an unknown person who demanded the key to the baggage compartment of the transcontinental sky sleeper as the plane neared Nashville last night.

The stewardess' story, as given out by Paul Stanley, local sales manager for the airlines, said she was leaning over in the corner of the ladies' lounge when some man whispered into her ear "give me the key. Give me the key or I will slug you."

Then, Stanley said, the stewardess said she was felled by a blow on the head and that as she lay on the floor she managed to swallow the key.

NASHVILLE, Tenn., Aug. 8.—(AP)—American Airlines officials expressed belief today that injuries to Rosemary Griffith, 24-year-old stewardess, found unconscious when her plane landed at Nashville airport last night, were the result of an accident rather than foul play.

An X-ray photograph showed she swallowed the small key to the

THIS YEAR'S COTTON CROP IS ESTIMATED AT 11,429,000 BALES

SLIGHTLY LESS THAN PRODUCTION DURING PAST YEAR IS FORECAST

WASHINGTON, Aug. 8.—(AP)—The Agriculture Department forecast this year's cotton crop today as 11,429,000 bales of 500 pounds gross weight, based on August 1 crop conditions.

Production was 11,817,000 bales last year and average 13,547,000 bales in the ten years 1929-38.

The forecast was based on the area in cultivation July 1, less the 10-year average abandonment from natural causes making 24,616,000 acres for harvest, and on the condition of the crop on Aug. 1. The condition was 72 per cent of a normal, compared with 74 a year ago, and 71, the ten-year average. The harvested acreage was 23,928,000 last year, and the ten-year average was 31,235,000 acres.

The indicated yield of lint cotton per acre is 222.3 pounds, compared with 237.9 pounds last year, and 198.1 pounds, then ten-year average.

Ginnings from this year's crop to August 1 were reported by the census bureau to have totaled 31,966 running bales, counting round as half bales and excluding linters, compared with 137,254 bales a year ago, and 157,865 bales two years ago.

The forecast of the area in cultivation July 1 less the 10-year average abandonment, condition of the crop on Aug. 1, indicated acre yield and total production indicated from Aug. 1 conditions, by states, included:

Missouri 391,000 acres; condition 80 per cent of a normal; indicated acre yield 374 pounds, and indicated total production 306,000 bales; Arkansas 2,154,000; 76; 292 and 1,315,000; Louisiana, 1,178,000; 59; 202 and 496,000; Oklahoma 1,854,000; 77; 163 and 630,000; Texas 8,721,000; 72; 159 and 2,893,000; New Mexico 109,000; 94; 595 and 112,000.

New Government Loan

The department's production forecast was expected to be followed by announcement soon of provisions of a new government loan to growers on this year's crop. Such a loan would be designed to

THRILLER AIR FIGHT ENDS WITH BRITISH APPARENT VICTORS

HOUR'S BATTLE OVER CHANNEL AND ENGLISH COAST COST INVADERS HEAVILY

LONDON, Aug. 8.—(AP)—Fifty-three German planes were destroyed in attacks on British convoys in the narrow waters of the English Channel today in the biggest series of air ecounters of the Battle for Britain the British officially announced.

An admiralty-air ministry communique said it was confirmed that at least 53 German planes were shot down and said 16 British fighter pilots were missing after repeated onslaughts by the German air force at a convoy along the southeast coast.

(A special German communique said 34 British planes were shot down and 12 ships totaling 55,000 tons had been sunk. It was claimed also that a tanker and two steamers were sunk by similar attacks by speedboats prowling Britain's coast last night.)

The British said one German speedboat was sunk and another damaged, but admitted the loss of three coastal vessels and damage to several others in the attacks by the Nazis' torpedo-shooting boats and the bombers.

Britain also struck at the big German naval base of Kiel off the North sea last night, dumping bombs through the mist and low clouds on the dockyards and starting a series of fires and explosions.

The French port of Cherbourg also was attacked in daylight by the British.

LONDON, Aug. 8.—(AP)—At least nine German planes — six dive bombers and three fighters—were shot down in a huge air battle which raged along England's southeastern coast this morning, an official announcement said.

When the Germans attempted another raid on a convoy off the southeast const this afternoon, another German plane was forced down—bringing the total to ten for the day. One of the German airmen was killed and his companion captured.

Two British fighter pilots were missing after the battle, which followed a German bombing attack on shipping in the narrow waters of the English Channel.

It was estimated that some 50 planes were engaged in the battle, which spread inland over the constal area.

In one town, where the Germans and low-flying British Spitfires dived at full throttle with machine-guns blazing, a local court continued to hear cases while the widows of the courtroom rattled to the bursts of gunfire.

The air battle raged far over the Channel, with planes darting

SECRETARY KNOX ASKS AUTHORITY TO HOLD ENLISTED MEN

WOULD RETAIN NAVAL AND MARINE CORPS MEN IN SERVICE INDEFINITELY

WASHINGTON, Aug. 8.—(AP)—Secretary Knox asked congress today for authority to hold future naval and marine corps enlisted men in service indefinitely during war or "declared emergencies."

He stated the latest move of a series designed to strengthen the manpower resources of the armed forces for any emergency.

Present law permits involuntary extension of enlistments only in time of war.

The senate agreed to vote by 3 p. m. Central Standard time, on legislation for calling out the National Guard and officer and enlistedreserves for training. Both advocates and opponents predicted passage.

Disposal of the guard bill will clear the way for debate on the Burke-Wadsworth compulsory training bill, which could be taken up immediately.

By the Associated Press

WASHINGTON, Aug. 8.—Senate rejection of a proposal to let national guardsmen resign rather than enter active training pushed the militia mobilization bill to the verge of passage today.

Senator Barkley of Kentucky, the democratic leader, sought a vote by 3 p. m. CST on the measure, which would authorize the president to call the guard and the officers reserve corps into service for a year. Both advocates and opponents agreed it would win approval.

The amendment to give guardsmen and reserves 20 days after the bill's passage in which they could turn in their uniforms failed yesterday 47 to 36. It was offered by Senator Danaher (R-Conn), who contended that many men had enlisted in the belief they would not be called to duty outside their own

FRENCH "WAR BLAME" TRIAL IS SET FOR ANCIENT CITY OF RIOM; WILL CONSUME MANY WEEKS

By JOHN LLOYD.

RIOM, France, Aug. 8.—(AP)—The formal setting for the "war blame" trial, called here "the greatest trial in French history," was laid today in this ancient city where the supreme court of defeated France will sit to determine who and how many led the nation to disaster and what punishment they should suffer.

Inauguration of the nation's new high tribunal, brought into being by the Petain-Laval government and charged specifically with judging acts and men of previous regimes, will lead at once to exhaustive investigation of factors which involved France in an ill-fated war against Germany.

Today's brief ceremony turns over the tribunal to 62-yeor old Pierre Caous who, as president of the supreme court, will have direct charge of the trials.

The war-blame inquiry itself may not get under way for several days. Weeks, and even months of judicial investigation may ensue before the defendants are officially named and specific charges entered against them.

War and pre-war government leaders who have been mentioned in the French press include former Premier Edouard Daladier, his successor, Paul Reynaud. General Maurice Gamelin, former (Popular Front) Premier Leon Blum, former Air Minister Pierre Cot and former Minister of Interior Georges Mandel. How many will face formal charges remains for the court to decide.

Apparent Complacence Of British In Face Of Reported Italian Successes In Somaliland Is Based Upon Hard Facts

By DeWITT MACKENZIE
Associated Press Staff Writer.

Signor Mussolini has hewed off for himself a considerable piece of Britain's hot and inhospitable Somaliland but, while in theory this may have advanced him toward control of the southern gateway to the Suez Canal, one suspects that he may find it a mixed blessing.

There is more than meets the eye in the seeming complacence of the English as they pursue what they describe as a strategy of "active defense" and give ground to numerically superior invaders. The reasons are several.

For one thing there are no supplies for the Italians in either British Somaliland or in adjoining French Somaland, which they are using as a base. They must depend on what they have in their African possessions, for the Suez Canal—only direct communication with Italy—is closed to them.

Then the fascist forces likely are headed into a bunch of grief with the Somalis. These natives are a hard lot, whom the British finally got in hand, after years of warfare but who will fight at the drop of the hat. They are anti-everything that's foreign, and the Italians must expect to have to conquer them before consolidating their gains.

Beyond all this, however, is the vital fact that Il Duce can't get control of the Suez Canal and the Eastern Mediterranean without smashing Egypt and ousting the British. He has troops massed on the Libyan border, presumably ready for the assault, but one wonders whether he won't pause before sending his forces out to make their way across more than 400 miles of blazing desert, with every oasis and water-hole heavily guarded by the British.

Or, to get right down to cases, the outcome of this whole African show is likely to be determined, not on the Sahara but on the English Channel. For as Hitler's blitzkrieg against England goes, so will go the conflict on the dark continent.

Should the Italians undertake the assault on Egypt, we shall have a campaign that will present the other extreme of the terrible conditions under which the Russo-Finnish war was waged. Then wounded soldiers froze stiff as they fell in the killing temperature of 52 degrees below zero. Now men will be called, to fight under a sun which

LIFTING LIFE'S LEVEL BY VIEWS OF NATURE AND GOD*

In Perplexing and Ominous Times, Men Take Refuge in the Great Verities—When Everything Human Changes, Nature Remains and God Is Still True.

By WILLIAM T. ELLIS

Dr. Henry van Dyke used to tell of finding one of his guides, during a wilderness trip, on the top of a mountain at the close of a hard day. The man had spent long hours in wearying labor, and why he should cap it all by this arduous climb caused his employer to ask, "Henri, why did you climb away up here?"

"It gives me a feeling of heaven-uphistedness," simply replied the French-Candian.

That unlettered man of the woods was kin to the Hebrew Psalmist of olden days. He found in nature, and in large outlook, a stimulus for the day's toil. He recognized the needs of his immortal spirit, which sought sustenance in a contemplation of God and His works.

This beautiful Nineteenth Psalm, so often the refuge and delight of nature lovers, is the assigned Sunday School Lesson for today. Its opening lines are among the most familiar in literature:

"The heavens declare the glory of God;
And the firmament showeth His handiwork."

It somewhat rebukes our pride in our modern literature that this lofty poem was written in the long-ago, far-off days of human history. Poets are plentiful nowadays, but none of them has matched this immortal utterance. Indeed, we are constrained to contrast the trivial themes of our petty modern verse with the sublime simplicity of the Psalms and their majestic treatment of God, nature and man. No wonder these ancient poems are the daily comfort of millions of devout men and women.

A Refuge For These Days

In a period of panic, such as the present, when the whole world is woe-begone, it makes for strength and serenity to view afresh the dauntless processes of nature. A few days ago, stunned by the radio's reports from Europe, I sat working in front of the fireplace in our Canadian log cabin, subconsciously resentful of unseasonable weather. My writing would not "march." I was in no mood to counsel my fellow men. So I laid aside pen and paper and went out onto the rocks, amid the pines where the lake shimmered before me. I mused upon the changeless march of nature amidst all human vicissitudes. Here were the old, simple things that last—the sky, the sun, the rocks, the woods, the waters. God has not gone out of business, despite all of man's waywardness and folly. In the mood of the Nineteenth Psalm I returned to my work, with shoulders squared and spirit uplifted.

It is good practical advice for all of us, amidst these days of crashing nations and of triumphant paganism, simply to get out of doors, to be taught by the eternal simplicities of nature. We are reading too much in the newspapers and magazines, and listening too often to the radio. Our nerves are jangled, our steadiness of soul is shaken and our faith is clouded. So let us get away from people for a time, to be alone with the Eternal and His handiwork.

A Bigger Idea of God

Lawrence of Arabia told me the story, which he later published, and which has been widely quoted, of a conversation that he once had with an Arab companion, as they rode camels by night across the desert. The brilliant stars prompted him to inform his untutored companion of the discoveries of modern astronomy. The Arab listened with attention until Lawrence was through. Then he replied, in simple confidence:

"Yes it is true. The foreigner looks through his wonder-glasses and beholds millions of stars. And that is all. He is proud of his knowledge. But the Arab looks up and sees, you say, only a few stars. But behind the stars he sees God."

That is the gift of eyes that makes the Arab content and that made the Psalmist great. Beyond the creation he beholds the Creator. Stretching past the effect, he sees the Cause. In nature's works he finds nature's God. In that simple faith the Arabs have outlasted all the proud empires of history. They are a God-conscious, and therefore an undefeatable people.

We think their religion imperfect and inadequate. But at least it is founded upon and encompassed by a great idea of God. And as is a people's faith in God, so will its strength be. Already we are seeing one supreme benefit of the present holocaust: it is turning mankind in desperation back to the God of our fathers. We hear of great gatherings for prayer in many places. Church attendance everywhere has suddenly increased. Religious literature enjoys a new vogue. The Bible is being read as never before in living memory. All the world is searching for God. Life's level is being lifted. People now scorn the petty, distorted themes and pursuits that recently engaged them.

Linking Law and Life

After his sublime tribute to nature, the Psalmist turns to that other great wonder, the Law of God. He links the two as eternal verities. The Creator has not left His plans for man to be discovered by the instruments of modern science. They are revealed in the inspired word. He has laid down a moral law as sure and as eternal as the laws which keep the universe whirling. The philosopher, Kant, once wrote: "Two things are awe-inspiring: the starry heavens above, and the moral law within."

"God is our refuge and strength," declared the Psalmist. He is ultimate defense and succor. During the dark days of the war President Lincoln once said, "I have often been driven to my knees, by the consciousness that I had nowhere else to go." The whole British Empire is sharing that mood today. Last evening I attended an Anglican church service, on our first Sunday of this Summer in Canada. I noticed a great change in the preacher and in the whole service. The spiritual note was deep and real. One could fairly feel the eager, anxious, expectant dependence of the worshippers upon the God who alone can save the nation in this dire crisis.

For twenty years past the world has neglected and disobeyed God's clear law. Our sinning is now having woeful consequences. And we are returning, in contrition and penitence to Him. Anew we are learning to say with the Psalmist: "The law of the Lord is perfect, converting the soul; the testimony of the Lord is sure, making wise the simple. The statutes of the Lord are right, rejoicing the heart; the commandment of the Lord is pure, enlightening the eyes. The fear of the Lord is clean, enduring forever; the judgments of the Lord are true and righteous altogether. More to be desired are they than gold, yea, than much fine gold: sweeter also than honey and the honeycomb. Moreover, by them is Thy servant warned: and in keeping of them there is great reward."

SEVEN SENTENCE SERMONS

Let a man learn that everything in nature goes by law, and not by luck, and that what he says he reaps.—Emerson.

We can reason down a man's theology but we cannot reason down the life of a Christian man.
—Alexander McKenzie.

Our acts our angels are, for good or ill,
Our fatal shadows that walk by us still.
—Fletcher.

Perseverance is more prevailing than violence; and many things which cannot be overcome when they are together yield themselves up when taken little by little.
—Plutarch.

Pride goeth before destruction and a haughty spirit before a fall.
—Proverbs 16:18.

If I have faltered more or less
In my great task of happiness;
If I have moved among my race
And shown no glorious morning face;
If beams from happy human eyes
Have moved me not; if morning skies,
Books, and my food, and summer rain
Knocked on my sullen heart in vain,
Lord, Thy most pointed pleasure take
And stab my spirit broad awake.
—Robert Louis Stevenson.

The true secret of happiness is not to escape toil and affliction, but to meet them with the faith that through them the destiny of man is fulfilled; that through them we can even now reflect the image of our Lord and be transformed into His likeness.—Canon Wescott.

CAMP RECEPTION IS GIVEN CORSICANA GUARDSMEN IN CAMP

UNITS READY WORK AFTER PRELIMINARIES; OTHER UNITS ENVY LIGHTS

By FIRST LT. PAUL DRESSER
Battery D, 132nd F. A., T. N. G.

CRAVENS, La., Aug. 8.—(Special to the Sun)—Battery D. arrived in camp near Cravens, La., at 2:30 p. m., Saturday, without any mishaps and had camp partially set up by dark—with prospects for a fine beginning but "Old Man Weather" changed the plans and a cloudburst early Sunday morning delayed the final setting up of the camp. However, the soil is sandy and, by mid-afternoon the camp site was comparatively dry. All men are still in perfect physical condition and no member of the entire Second Battalion has had to be sent to the hospital. Morale in the Battery is exceedingly high; everyone is doing his share of the work and the recruits are rapidly becoming accustomed to the routine of camp life.

The medical officers gave their annual physical examination to members of the regiment Monday and all members of Battery D were in perfect shape. Monday morning was devoted to cleaning guns, trucks, material, and completely finishing the setting up of the camp.

Tuesday the Battalion was to be carried out to a training area for regular work, which included gun drill, communication training and work with the survey instruments. Section chiefs were to be given special instruction in firing at moving targets with direct laying as the first day next week they will be allowed to fire at this type target.

Officeres began their daily firing schools in preparation for the target practice next week which will be held about 70 miles from the base camp.

The first copies of the Daily Sun arrived today and the several copies were soon distributed to the men. This courtesy, which has been extended to Battery D by the Sun-Light Publishing Company for the last several years, is greatly appreciated by every man in the Battery as it helps him keep up with local events and members of Battery D again take this means of expressing their thanks to the Daily Sun.

Battery D and Battery E seem to be the only two units in the artillery brigade that has electric light plants and they are the envy of the other units. Second Lt. John D. Bennett is chiefly responsible for the small portable light plant in D Battery, which he made from a small gasoline motor and a couple of generators. Electricity is stored in a regular six volt battery. Lights have been placed in the four officers' tents, kitchen and battery headquarters.

GIANT PATCHWORK KNOWN AS INDIA RICH IN MANPOWER AND RESOURES BUT LACKS UNITY

(By The Associated Press.)

The Giant patchwork known as India is a confusing complex of racial, religious, cultural and political rivalries over which Britain gradually gained dominance in the 17th and 18th centuries.

India's size and difficult geographical nature make for lack of unity. It is rich in manpower and natural resources.

With 6,000 miles of land frontier and 5,000 miles of seaboard, India has an area of more than 1,808,000 square miles, and a crowded population of more than 350,000,000.

These millions — between one-fifth and one-sixth of the earth's population—present all shades of social and economic variation, from fabulously rich Maharajahs to poverty-stricken "untouchables."

With the blood of many races in their veins, these peoples speak more than 200 languages and dialects and practice many religions, some of them bitterly antagonistic to one another.

The vast Hindu group has 240,000,000 adherents in India, the Moslems some 77,000,000.

India is divided politically into a British India of 11 provinces whch are governed by representatives of the crown, and a native India of more than 560 states ruled with varying degrees of authority by native princes who hold their power through treaties and alliances with Britain.

The conflict between the great Hindu majority and the militant Moslems, who provide some of the best fighting men in the British Indian army, and that between the native princes, who depend largely on British support to hold their thrones, and the independence-seeking masses led by the congress party, have further complicated Britain's problems.

Eight of the provincial governments controlled by the congress party resigned early in the war because of dissatisfaction with Britain's promises of post-war dominion status. The British governors had to take over.

The Indian princes have strongly supported the British war effort out of their wealth, drawing on some of the largest fortunes in the world. Indian troops, especially Sikhs and Gurkhas, form an important part of the British "middle eastern command," arrayed in Egypt, Palestine and East Africa for defense of the empire's lifeline to India and the Orient. Their numbers have not been announced, but they have been estimated at scores of thousands.

Corsicana Guardsmen All Reported Well

Lieut. Ernest L. Kirkland of Battery D of the 132nd field artillery with the National Guard in army maneuvers in Louisiana, telephoned the Daily Sun Thursday morning and said that all members of the battery were well and doing fine. Heavy rains have fallen there since Sunday, he said, but no damage was done by the hurricane at the camp.

Most Valuable Of Stamps Purchased For Unnamed Client

NEW YORK, Aug. 8.—(AP)—The world's most valuable stamp, long sought for the royal collection by the late King George V, has been purchased by Macy's department store for an unnamed client.

It is a one-cent British Guiana print, issued in 1856 and valued today at $50,000. It is listed in stamp catalogues as the only example of its kind in existence.

The owner was Mrs. Ann Hind Scala, of Utica, N. Y., who once refused an offer of $38,000 for the stamp. The price paid to her by Macy's was not disclosed.

IMMUNIZATION FROM MALARIAL TREATMENT TRIED ON GUARDSMEN

QUESTION ARISES WHETHER IT IS TEST TO DETERMINE HOT WEATHER SERVICE

CAMP BEAUREGARD, La., Aug. 8.—(AP)—Southern national guardsmen here for war maneuvers are getting some immunization treatment for malaria, a tropical disease, but the Army says officially it's only routine.

Questions as to whether tests were being made to determine how best to treat any army called to service in such hot climes as Central and South America drew no comment from officers. Press headquarters said it was "rountine and not experimental."

The malaria germ is carried by the mosquito and it was only after that pest was curbed that the United States was able to build the Panama Canal. Many soldiers died of the disease in Cuba during the Spanish-American war.

Bogged down in a sea of mud and rain, by-products of a tropical hurricane which swept along the Gulf of Mexico coast, guardsmen marked time today awaiting clearing skies. The storm yesterday swept the tented cities in which troops are bivouacked, confining thousands to quarters.

Clearing skies promised a start of training for 20,000 troops at Camp Shelby, Miss.

UNITED STATES MAY HOLD FROZEN FRENCH ASSETS FOR WAR DEBT

POSSIBLE CHANCE GETTING SOME PAYMENTS DISCUSSED BY MORGENTHAU

WASHINGTON, Aug. 8.—(AP)—Secretary Morgenthau disclosed today that the United States was considering the possibility of taking world war debt payments out of frozen French funds in this country.

When the subject of war debts was raised at his press conference, the treasury chief said that before French funds are released he wants to see "what happens of American investments and debts over there."

The treasury head referred many times to the possibility of offsetting American business and other losse in the invaded European countries against the funds of those countries being held here, but formerly he had given no reply to inquiries about world war indebtedness.

France alone owes this country about $4,000,000,000 from the last war.

Asked whether the freezing regulations, imposed upon the funds belonging to invaded nations and their peoples, also applied to Germany, Morgenthau replied:

"No, any amount of money can be sent to Germany, and there is nothing we can do about it. It's silly but we are at peace with Germany and cannot do anything about its funds."

A reporter remarked that this country also was at peace with France but had frozen her funds. Morgenthau explained that what he meant was that freezing orders applied only to invaded countries, rather than ones at war, because when a country was invaded a question arose whether its citizens tried to get money from this country on their own initiative or under "duress" of the invaders.

CORSICANA, TEX., AUG. 9, 1940

WHY TRAIN?

In pioneer times, when every householder had a gun behind the door or hanging above the fireplace, it was easy for a nation to "spring to arms" overnight. The youngsters learned to shoot early. It was necessary, not only for protection against enemies but against wild animals, and also for providing food and skins.

Today most of us have no guns and don't know how to shoot. But even if we had them, it wouldn't make our young men any better prepared for operating the weapons of modern war. It isn't a simple matter to spring to tanks, bombers and anti-aircraft guns overnight.

The pioneer, too, found a handy tree useful protection from the other fellow's gun or bow and arrows. But anyone who goes into modern battle needs to know how to defend himself from a vareity of new perils.

At least, these are among the arguments of citizens who though hoping America will not go to war, yet want all the youth of the land—not just volunteers—to have military training.

BETTER WHEAT

Scientists of the Georgia Experiment Station have been trying for twenty years to develop better wheat. Now they have one said to resist leaf-rot and to be capable of much higher yield than any they have grown before. The new grain has been named the Sanford wheat in honor of Dr. S. V. Sanford, chancellor of the state university system. More than 3,000 bushels of the new seed wheat will be distributed to Georgia farmers this autumn. If it proves to be all that is hoped, it should bring several dollars an acre extra to the farmers who plant and cultivate it.

Quietly and patiently the research scientists of university and government experiment stations go about their labors. Often they are hardly heard of outside of their immediate localities. But their work is extremely useful, for the present and future of America.

HORSES IN TRUCKS

Time was when the horse was the accepted means of transportation all over the West. But now it's different. Along the big highways the Forest Rangers load their horses onto trailers and drive to the points where they have to leave for roads and trails not accessible to motor cars. The Rangers cover their beats far more qickly in this modern manner. They can cover ground in a day or two which formerly took a week or more. Throughtout 107 of the forest districts the new horse trailers will be used.

Pretty soft for the horses to be getting all those free rides? Sure. And for the men, too. But there's plenty of hard work left both for man and beast in the Forest Service. And the greater protection given the forest by the increased speed of covering the ranges is a decided gain. Every American profits by conservation of natural resources whether he is conscious of it or not.

Two things to remember about a heat wave: First that it's normal and second that its worst effects can be avoided by following the well known rules of rest and temperate eating and drinking.

JUST FOLKS

(Copyright, 1937, Edgar A. Guest)

AT NIGHT.

By day the king may wear his crown,
By day the crowds may cheer,
But when at last the night comes down
And stripped of all his gear
He sleeps within his armored tower,
The king has neither pomp nor power.

By day the monarch rules the land
And subjects fear his might,
But there is none he can command
To serve his will by night.
Not all his soldiers, fierce and grim,
Can keep an evil dream from him.

By day the rich, the proud, the great
May strut the long hours through,
But night may give a kindlier fate
To more than just the few.
And who at night knows peaceful rest
Till morning comes, is happiest.

NO NEED FOR EXODUS

Frankness and courage distinguish Winston Churchill's conduct of the war so far. When he makes a mistake he is not afraid to admit it. He doesn't waste his own or the nation's time and energy trying to save face.

So when Churchill tells the House of Commons that the proposed exodus of children to the Dominions and the United States turns out to be unnecessary and undesirable he is listened to with respect. He said:

"I must frankly admit that the full bearings of this question were not appreciated by the British Government at the time it first was raised. It was not foreseen that the mild countenance given to this plan would lead to a movement of such dimensions, and that a crop of alarmist and depressing rumors would follow at its tail, determined in the interest of national defense.

"I take full responsibility for the steps originally taken, and I ask for the indulgence of the House on account of the many difficulties through which we have been passing."

A good many Americans who have been taking sober second thought about the matter will agree with Mr. Churchill. Sending a few thousands of young people to the homes of relatives or friends or even to those of open-souled strangers sounded like a good idea. It probably still is a good idea. But turning the forces of administration which should be concentrated on defense over to the problems of wholesale evacuation is not the same thing. Such matters as those of shipping, of examining the type of home to which every child goes, of seeing that they are not exploited, raise difficulties of vast magnitude. And the breaking up of families, the difficulties of reuniting them later, are not to be lightly regarded.

HORRORS

No rational American wants to take a horror bath, but neither do we want to harden our hearts and shut our eyes to what is going on in less happy parts of the world, among the victims of military and ideological wars. Morris C. Troper, European chairman of the American-Jewish Joint Distribution Committee, says:

"It is impossible to picture to Americans who live in peace and security the horrors that are taking place all over Europe today. Hundreds of thousands who formerly lived in comfortable circumstance found themselves suddenly deprived of everything. The shock of events, the sudden uprooting from home and land, will leave their marks upon people forming the backbone of European culture and civilization unless they receive immediate material and moral encouragement from abroad. They must be assisted in their struggle for survival on a continent where respect for human dignity has lost much of its meaning."

A place we'd like to visit is Kittigazuit up near the Arctic Ocean, partly because it must be cool there but mostly becase it's such a rhythmic name.

MAKING THE OSTRICH S...

RECOVERY OF LOOT EFFECTED BY COUNTY OFFICERS THIS WEEK

SIX MEN BEEN ARRESTED BY LOCAL, LIMESTONE AND FREESTONE OFFICERS

Six men have been arrested and a series of burglaries and thefts in Navarro and other counties are believed cleared, according to an announcement Tuesday morning by Sheriff Cap Curington.

Sheriff Curington and Deputy Sheriff Jeff Spencer, working with Limestone and Freestone county officers for the past several days, have recovered numerous tires, a quantity of oil and other merchandise in Cerokee county, near Jacksonville, and in Limestone county.

Among the loot recovered at and near Jacksonville were 292 quarts of Texaco and Havolene motor oil, six 5-qfart cans of Texaco oil, thirteen 5-pound cans of Texaco grease, five U. S. Royal tires and tubes mounted on wheels which were on other cars.

A man arrested at Jacksonville, according to the sheriff, will be charged at Bremond with receiving and concealing stolen property.

A car stolen at Bremond has been recovered at Jacksonville after it had been stripped and stolen.

Tom Robinson, resident of near Mexia, was named in formal complaints before Judge A. E. Foster, with assessory to theft and receiving and concealing stolen property. He made bond Monday afternoon in the sum of $2,000 in each case and was released.

Marion Moss of Thornton, formerly of Corsicana, was charged by complaint with auto theft in connection with the entering of the Howell Brister garage at Kerens, July 17, this year, and the taking of a new automobile. The car was reported found abandoned near Teague. Moss is reported also charged in Limestone county and has been arrested.

One juvenile connected with several of the above alleged transactions also has been arrested, the officers reported.

Loot recovered in Limestone county included four Pennsylvania tires and two others which had been put on cars in that area and nine cases of Mobiloil. A portable typewriter, stolen in Limestone county, also was recovered at Jacksonville.

Four white men and a negro are in jail in Limestone county, Sheriff Curington reported, while one white man is in the Cherokee county jail.

The officers said the case of a car recently recovered here, stolen at Mineola, had been cleared. A quantity of other loot missed in a series of burglaries in this county in recent months in which filling stations and oil warehouse had been entered was expected to be recovered and cases filed before the investigation is completed.

Charges Filed

GROESBECK, Aug. 6.—County Attorney L. L. Geren Monday announced Marion Moss, 22, of Thornton, had been charged with burglary and car theft and was being held in the county jail.

Priere Davis, 16, also of Thornton, was charged with burglary and automobile theft in juvenile court.

Officers are investigating the theft of an oil truck in Hearne Tuesday night; the burglary of Abe Schwartz' store at Groesbeck Wednesday morning, and the theft of an automobile at Jacksonville Wednesday night. Four dozen shirts stolen from the Schwartz store were recovered under a bridge near Thornton. The oil truck was found abandoned at Frankston, officers said, and a new Dodge automobile stolen at Jacksonville was left at Bremond.

Geren said the two men had made statements about the affair.

COTTON MILLERS TO PLAY TYLER CHAMPS GAME THERE SUNDAY

The Corsicana Cotton Mill baseball club, winner of the Navarro county hardball championship, will journey to Tyler Sunday, August 11, to meet the Tyler champions in the first out of a three game series for the Texas Amateur Athletic Association's bi-district title. Tyler will come to Corsicana Sunday, August 18, for the final game in the series.

Winner of the Corsicana-Tyler contests is slated to engage Fort Worth in Fort Worth, September 1-2, and the winner of this meet will oppose the Dallas district champions for the North Texas title. The state championship series, which will be played between the North and South Texas champions, is scheduled to be held September 7-8. Galveston, Austin and San Antonio are the three teams composing the Southern conference.

Series of Gospel Meetings at Barry

Cecil Perryman, a young Gospel preacher from Florida, is to begin a series of Gospel meetings at Barry beginning Sunday, Aug. 18, continuing for two weeks.

In Local Hospital

KERENS, Aug. 7.—(Spl.)—Mrs. W. S. Price, who suffered a fractured aarm when she slipped on a rug at her home here last week is recuperating in the Navarro Clinic Due to a triple break, her arm has had to be encased from shoulder to wrist, which has caused a great deal of discomfort.

Cream Supper

There will be an ice cream supper at Roane Methodist Church, Friday night, Aug. 9th, benefit of the church. Candidates especially invited. Everybody welcome.

PIONEER RESIDENT RURAL SHADE AREA BURIED ON TUESDAY

Funeral services were held Tuesday afternoon at 4 o'clock at Rural Shade for E. S. Quinn, aged 79 years, pioneer resident of Southeastern Navarro county, who died Monday. Burial was in the Long Prairie Cemetery.

Surviving are his wife of Rural Shade, eight children, Mrs. Tommie Thorn, Barry; Grady Quinn, South Gate, Calif.; Mrs. Joe Trent, Rural Shade; Johnnie Quinn, Rural Shade; Mrs. Tom Bradley, Trinidad; Mrs. Nell Mayo, Longview; Lloyd Quinn, Rural Shade, and Mrs. Ware Phillips, Rural Shade; 24 grandchildren, two brothers, Will Quinn and Charlie Quinn, both of Pittsburgh, Texas; two sisters, Mrs. W. H. Stevens, Kerens, and Mrs. Lela Ballard, Mineola, and a number of nieces and nephews.

Goes to Havana on Vacation.

KERENS, Aug 7.—(Sp)—William Stockton, of Alice, son of Mr. and Mrs. P. N. Stockton of Kerens, sailed Sunday from New Orleans for Havana, Cuba, on his vacation.

Goes to Grandview.

KERENS, Aug. 7.—(Spl.)—Miss Freida Smart, who has been instructor of the local NYA which has been indefinitely closed, left Friday for Grandbury, where she will fill a similar position.

MRS. LAURA FARMER OF ROANE BURIED AT OAK GROVE TUESDAY

Mrs. Laura A. Farmer, aged 71 years, wife of I. N. Farmer, died at the family home in Roane Monday afternoon at 4 o'clock.

Funeral services were held Tuesday afternoon at 2 o'clock at the Oak Grove Baptist church. Burial was in the Oak Grove cemetery.

Prior to moving to the Roane community a year ago, Mr. and Mrs. Farmer had resided in the Oak Grove community for a number of years.

Surviving are her husband, five sons, Lonnie Farmer, Roane; W. W. Farmer, Rogers; D. N. Farmer, Corsicana; Odie Farmer, Rogers, and Lee Farmer, Corsicana; four daughters, Mrs. A. B. Runnels, Barry; Mrs. R. R. Price, Corsicana; Mrs W. B. Brewster, Harlingen, and Mrs. Mattie Crowley, Kerens; 21 grandchildren and a number of great grandchildren and other relatives.

Corley Funeral Home directed the arrangements.

SIDNEY F. BAKER, OFFICIAL OF COTTON BELT RAILWAY, DIES

TYLER, Aug. 7.—(Spl.)—Sidney F. Baker, 63, general freight agent of the Cotton Belt Railroad, died here Tuesday after an illness of three weeks. Funeral services were conducted Wednesday morning.

Surviving are his widow, a son, Sidney F. Baker, Jr., of Tyler; a sister, Miss Mary Baker, and a brother, S. W. Baker, both of Dallas.

Baker's death ended thirty years continuous service with the Cotton Belt system, and most of the time his headquarters were in Tyler. Prior to that time he had been connected with the Katy and Kansas City Southern lines.

Mr. Baker was well known in Corsicana and was a frequent visitor in the city both on business and socially.

Trinidad Woman Died Local Hospital

Mrs. Alice V. Philips, aged 69 years, of Trinidad, Route 1, died at the P. and S. hospital Wednesday morning.

Six Burglaries In Corsicana Solved By City Officers

A series of burglaries in Corsicana have been solved by city officers and Ira Jones, negro, was charged in six burglary complaints before Judge Pat Geraughty Tuesday morning.

The complaints were signed by M. S. Griffin, city detective, and were accepted by Chas. T. Banister, criminal district attorney. A minor negro, also arrested in the same series of cases, was charged with delinquency in a case filed by the criminal district attorney.

Cases filed were in connection with the burglarizing of the Arthur Boldin, A. H. Newton, D. B. Davis and A. F. Mitchell premises on July 31 and Earl Auld and R. Grossman on August 1.

The W. B. Mayos Are Happy Over Arrival Baby Son on Sunday

A little son was born to Mr. and Mrs. W. B. Mayo Sunday morning, August 4, at 7 o'clock at the Navarro Clinic, who tipped the scales at six pounds.

The little fellow has been named Willard for his daddy and David for his grandfather and great-grandfather on the Langston side of the family.

Both the mother and baby are reported doing nicely, and according to present plans will be taken home Thursday.

The many friends of the happy parents and grandparents, Mr. and Mrs. W. D. Langston of this city, and Mr. and Mrs. B. Mayo of Montfort, join in extending hearty congratulations at this eventful time in their lives.

Contracts Awarded For Improvements At State Home

The McAffee Construction Company of Dallas was awarded the general contract for the installation of accoustical material in the main auditorium of the State Home at a meeting of the board of control in Austin Monday.

Marvin Wallace, Corsicana, was awarded the contract for the electrical work and installation of an exhaust fan.

The total cost was approximately $2,200, it was announced Tuesday morning by J. S. Halley, superintendent.

Goes With Government.

Card of Thanks

We wish to thank our friends for their sympathy and words of kindness during our time of sorrow. also for the many beautiful flowers. May God's richest blessings be upon each and every one is our prayer.

MRS. CLAUD PREWITT
AND PREWITT FAMILY

IDLE LANDS UTILIZED AS MEADOW WATERWAYS

Thousands of acres of formerly idle land are being profitably utilized as meadow waterways by farmers who are establishing complete conservation systems on their land.

In Texas Soil Conservation Service Projects, more than 4,500 acres have been placed in new meadows or in meadow waterways such as the one shown in this photograph. In the Corsicana CCC work area a total of 119.5 acres have been or are planned to be utilized in this manner.

The meadow waterway not only provides additional hay for farm livestock, but it also furnishes a safe outlet for water from terraces. Run-off water which is emptied onto these waterways flows out of the field without causing erosion damage. The water is eventually released in woods, in a pasture, or in a natural drainage.

Many Texas farmers have both meadows and meadow waterways on their farms in order to produce sufficient hay for farm needs. Since the opening of soil conservation service projects in Texas in 1933, farmers have planned to increase the area in meadow waterways from 7,310 acres to 13,100 acres. In the Corsicana CCC work area more than 28 acres have been established in meadows.

The typical example of the value of a meadow is found on the farm of Mrs. Bertha Montfort, which is located nine miles northeast of Corsicana. Last year, the 12.5 acres of meadow on this farm produced 11 tons of hay, or an average of nine-tenths of a ton per acre. This hay was utilized by feeding to 22 head of beef cattle.

Mrs. Montfort is establishing a complete conservation system on her 191.0 acre farm. She is using contour cultivation, strip crops, winter cover crops, and terraces to control erosion on her cultivated land. Her pastures are being improved by sodding with bermuda grass, by controlling weeds and by regulating the grazing to permit the desirable pasture plants to reseed.

Food and cover for wildlife are provided by strip crops in the fields.

JAPANESE

(Continued From Page One)

proceed, cautiously but inevitably toward further extension of her influence.

At the moment the immediate point of pressure is French Indo-China.

(Reports from Hanio, French Indo-China today said the return of Gen. Issaku Nishihara, head of a Japanese economic mission, from Tokyo conferences was taken to indicate Japan would be content at present to pursue her aims through "persuasion.")

What the Japanese want most now is the right to transport troops and supplies over the French Indo-China railway into Yunnan province for a drive against Chinese-held Kunming, key city of Southwest China.

In the event of resistance, Japan was said to be ready to attack. This almost certainly would extend the Chinese-Japanese war to French Indo-China, since the Chunking government of Chiang Kai-Shek has announced it would send troops there to battle any Japanese invasion.

Americans Appeal for Support.

TIENTSIN, China, Aug. 8.—(AP)—American merchants here, acting through the U. S. Chamber of Commerce in Tientsin, appealed to the state department today for support against Japanese restrictions on imports from America.

The Tientsin chamber also was understood to be appealing directly to President Roosevelt to protest in Tokyo "these further encroachments on United States trade in North China."

American business men said the restrictions damaged not only the interests of importers of United States merchandise here but also manufacturers and workers in the United States.

Associated Press Science Writer

WASHINGTON, Aug. 8.—Some forms of black eyes and bleeding can be treated successfully with the new vitamin known as pantothenic acid.

Writing in the public health reports, Dr. Floyd S. Draft and Dr. W. H. Sebrell of the National Institute of Health and S. H. Babcock, Jr., and T. L. Jukes of the University of California said that the acid, newest fraction of the vitamin B complex yet discovered, is essential to the functioning of the adrenals, small glands which lie just over the kidneys.

These glands are among the most powerful in the body. They secrete epinephrine and cortin—hormones which maintain blood pressure and muscle tone, stimulate he heart and brain in emotions such as anger and fear, regulate the use of carbohydrates in the body, and control hair growth.

In a study on 48 white rats the four scientists found that even a slight deficiency of the vitamin, measured in millions of a gram, would cause excessive damage to the adrenal glands, nosebleed and other hemorrhages, "spectacled" or black eyes, and loss of hair.

Among the animals which were given 100-millionths of a gram of the vitamin every day, however, these symptoms did not occur.

Willkie Wants Hatch Bill Amended; Would Include President

COLORADO SPRINGS, Colo., Aug. 8.—(AP)—Aides of Wendell L. Willkie said today he would ask former President Herbert Hoover and Alf M. Landon, the 1936 republican nominee, to support his demand for broad amendments to the Hatch anti-politics laws.

Willkie told his press conference yesterday the existing act should be amended to require the president, cabinet officers and all other now exempt officials to file sworn statements of their assets upon taking office and upon leaving office.

He added that another desirable amendment would be a provision prohibiting any member of a family of an official from receiving compensation for representing clients before federal agencies.

If he is elected, Willkie said, he and members of his family will file statements of personal assets with the secretary of state regardless of whether the Hatch law is amended.

ing the step, listed accomplishments of the postal service, and added:

"I know that it will please you to learn that I have made definite arrangements for my future in private business where I know I shall be very happy."

F. D. R. Meets Hopkins, Wallace

HYDE PARK, N. Y., Aug. 8.—(AP)—A conference with Secretaries Wallace and Hopkins, which may set the course for the democratic campaign, was the major item on President Roosevelt's schedule today.

There was nothing to indicate whether the three would disclose immediately any strategy that might be devised, particularly since Wallace, the vice presidential nominee, has said he would keep out of the political arena until he has accepted his nomination officially. He will do that about August 20.

MILLIONS REFUGEES IN UNOCCUPIED PART FRANCE REPORTED

PARIS (via Berlin), Aug. 6.—(Delayed)—(AP)—Richard F. Allen, Red Cross official in charge of distributing food and clothing received from the United States on the relief ship McKeesport, estimated today there are about 5,000,000 refugees in the part of France unoccupied by the German forces.

He added that there are between 1,000 to 2,500 Americans in the area.

Allen said three-quarters of the food and clothing received on the McKeesport had been distributed to the departments in the unoccupied territory.

The refugees, Allen said, include 3,500,000 French, 1,000,000 Belgians, and 500,000 Germans, Austrians, Netherlands, Luxembourgers and Spanish. Most of them are living in hotels or homes and very few in camps or barracks.

INTERNATIONAL

(Continued From Page One)

be placed under constant fire from air and land and perhaps from sea.

Nazi Night Raids.

After a night of camparative quiet, German bombers carried out extensive raids on Great Britain during the night, dropping bombs and leaflets containing extracts of Hitler's recent Reichstag address.

A British communique said casualties were few and damage slight "except that in one town in the northeast of England a sanatorium and shop property suffered considerably.'

In Africa Italians held the port of Zeila, seized in a short march from French Somaliland, and aimed a principal drive across British Somaliland toward Berebra. The British said massed Libyan troops have not yet pushed across the frontier into the west Egyptian desert.

In France the new supreme court was called to its first session today at Riom with its No. 1 job a lengthy, far-reaching investigation to fix the blame for France's war blunders and to punish the guilty.

Rumania On Spot.

Hungary served notice on Rumania that she would be content with no less than 75 per cent of the Rumanian province of Transylvania in their territorial dispute in which Adolf Hitler is said to have advised Rumania to settle promptly. Rumanian negotiations with Bulgaria over the latter's claims on Southern Dobruja were scheduled to open today.

Rumania, cleaving close to the nazi pattern, worked out new laws limiting the rights and activities of jews and making them liable to special taxes.

The United States speeded its defense armament program by putting army arsenals on a three-shift basis. Senate anti-conscription leaders lost a move to muster the National Guard for Federal service on a voluntary instead of compulsory basis. The house passed and sent to the senate a neutrality amendment that would allow U. S. Ships to enter war zones to bring back child refugees.

COTTON

(Continued From Page One)

holster prices, which have sagged in recent weeks in the face of unfavorable export prospects.

Officials have not indicated what the base loan rate will be. Cotton state senators have asked that it be fixed at around 10 cents a pound. Last year it was 8.9 cents.

Cotton now stored under government loans was reported at 2,223,538 bales. However, the government owns 6,643,571 bales acquired under foreclosure of past-due grower loans.

Official reports have indicated that this year's cotton will move to market with a smaller carryover facing it than last year's.

Consumption and Exports

Consumption and exports of American cotton approximated 13,800,000 bales in 1939-40, or nearly 2,000,00 bales above last season's production of 11,817,000 bales. This reduced the record carry-over of 13,000,000 on August 1, 1939, to an estimated 10,750,000 bales on that date this year.

Today's report indicated the crop in the Mississippi delta and in Alabama and Tennessee was from a week to 12 days late because of late plantings and frequent rains and cool weather until late July.

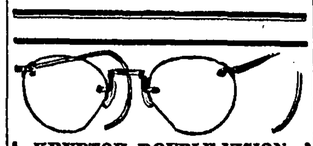

In Texas and Oklahoma, the crop was said to be only a few days late and in Georgia less than week late. In the Carolinas the crop was described as average or earlier.

Texas Wool Crop Is Estimated at Record

AUSTIN, Aug. 8.—(AP)—The U. S. agricultural marketing service today estimated Texas' 1940 wool crop at 83,648,000 pounds—an all time record.

The service said the current crop would exceed last year's by 6,358,000 pounds and was 21,668,000 heavier than a 10-year average prior to 1939.

The estimated number of sheep and lambs shorn or to be shorn this year was placed at 10,527,000 as compared with 9,844,000 last year.

Navy Is Seeking Healthy, Educated Young Men Daily

Young men, between the ages of 19 and 26 years, of good character, sound bodies, at least two years' standard college credits, with energy, ambition and willingness to work hard, are offered an exceptional opportunity for quick advancement in position and salary in the United States navy. A rare chance to qualify for leadership and service to the nation in anticipation of registration or draft is offered. Investigation is invited.—A. A. Allson, Postmaster.

MACKENZIE

(Continued From Page One)

registers maybe 125 and produces a soil temperature of 175 degrees

It seems almost impossible that men should be able to conduct war under such conditions. Actually, however, acclimatized troops get along first rate, with proper care.

The fortunes of Italy in an Egyptian campaign will rest in the hands of one of the greatest desert fighters of all time—Marshal Graziani, conqueror of Cirenaica and Libya. The Marshal knows all the tricks of the sands, as he will need to know, for he will be up against British officers who represent generations of training in desert warfare.

ITALIAN

(Continued From Page One)

a sort of window on the Indian ocean—Italians said.

They said these ports were much better for their new empire in Ethiopia than Jibuti, in French Somaliland.

The Italian communique today said their armored columns, accompanied by bombing planes, were wel ladvanced on the way to Berbera, having occupied Oadweina on Tuesday, as well as Hargeisa.

Both are about 30 miles inside the arid country, but a difficult march of 100 miles through rough terrain remains from Hargeisa, the nearest point, to Berbera.

The Italian communique said nothing of land operations near Bardia, where the British yesterday said the Italians were concentrating for an apparent offensive against Egypt along the Mediterranean coast.

Destruction of four British planes—three bombed on the ground at Wajir, Kenya colony, and the other shot down in an air fight—also was reported.

The Italians said two steamers out of a convoy of five being escarted by a British warship in the eastern Mediterranean were damaged seriously by aerial bombardment.

To My Many Friends

I wish to again thank you for the splendid vote I received in the July Primary. However, I did not receive enough votes to elect me. I will again be a candidate two years from now. Realizing the fact that Mr. Joe E. Daniel is blind and has no means of support for himself and wife, I will support him in the run-off, August 24th.

Respectfully,
W. J. (JINKS) BRYAN.

BRITISH

(Continued From Page One)

in and out of the clouds, sometimes fighting in formation, sometimes in individual dog fights.

One of the German planes shot down was a Messerschmitt 109, forming a part of the fighter escort of the heavy bombers. It plunged in to the channel in flames.

Battle Lasted One Hour

The battle, which grew out of the second raid along the southeast coast during the morning, lasted exactly an hour.

Planes often swooped within a thousand feet of rooftops and channel, but no bombs were dropped.

Clouds of smoke were seen near two ports where it was believed two raiders crashed.

The air was split with almost continuous cannon fire from the Messerschmitts, the sharp crackle of answering machinegun fire from the British Spitfires and an unusually heavy barrage of anti-aircraft fire.

Observers said Nazi fighters could be seen speeding out to sea as Spitfires dived on their tails from the clouds above.

One Messerschmitt tackled by Spitfires, dived down toward the sea, righted itself at a height of only a few hundred feet. Then it streaked off toward France—still pursued.

Carry Fight to Norway

An admiralty announcement said British planes had carried the war to German-occupied coast of Norway, with units of the fleet air arm successfully attacking a gasoline storage depot five miles south of Bergen.

Reports from the attacking Skuas (British bombers) indicated the entire gasoline depot had been destroyed.

The day's air activity followed a night of raids on English, Welsh and Scottish points.

Leaflets containing excerpts from Adolf Hitler's "peace or destruction" ultimatum also were dropped again.

In the night raids, the government announced, casualities were "very few," though some women walking on a country road were seriously injured. Damage was slight except in one town in the northeast England where "a sanatorium and shop property suffered considerably."

Seeking Aid American Negroes.

LONDON, Aug. 8.—(AP)—Sylvia Pankhurst, suffragist aide of Haile Selassie, whom Britain has recognized as the rightful ruler of Ethiopia, said today she was seeking to rally American negroes to a movement to overthrow the Italians in Ethiopia.

The author and propagandist, who has been acting in liaison with Selassie's organization of his peoples while Italy is busy fighting the British, said the main need of the Ethiopians was airplanes.

Barrage Balloons For Convoys

LONDON, Aug. 8.—(AP)—Barrage balloons flown by vessels in convoy is the latest British sea defense device.

Above the balloons, RAF fighting planes patrol the skies.

July Air Raid Casualties

LONDON, Aug. 8.—(AP)—Two hundred and fifty-eight civilians were killed and 321 injured seriously during air raids on Britain during the month of July, it was reported today in a written answer to a house of commons question.

Military Pay Increased

LONDON, Aug. 8.—(AP)—British sailors, soldiers and airmen received today a sixpence (10 cents) a day increase in their base pay. Heretofore they received two shillings (40 cents) a day.

The pay hike was announced by Chancellor of the Exchequer Sir Kingsley Wood to meet wartime increase in postal and railway charges and the new beer and tobacco taxes.

Italian Drive Halted

CAIRO, Egypt, Aug. 8.—(AP)—The Italian columns driving into British Somaliland from Ethiopia halted after their capture of Oadweina and Hargeisa "as anticipated," a British communique reported tonight.

Air reconnaissance over those towns in the western part of the protectorate "showed little movement," the communique said.

It reported continued movement of Italian forces, particularly "motorized transport," in the Libyan-Egyptian border region, "the western desert" where the British expect a large-scale Italian offensive shortly.

DEFENSE

(Continued From Page One)

states unless congress declared war.

Administration senators argued the guardsmen had enlisted to serve the nation in any emergency and should not be permitted to quit at a time when they were needed.

Neither side, however, acknowledged the vote as a clear-cut test of sentiment on the main controversy—whether conscription should be ordered to supplement the militia or whether voluntary army enlistments should be sought. Anti-conscription leaders supported Danaher's proposal.

As soon as the guard bill is acted upon, the senate will take up the Burke-Wadsworth conscription measure. A closely-knit group of senators met yesterday in the office of Senator Norris (In -Neb) to plan for a "full debate, no compromise fight" against the legislation.

The bill as approved by the senate military committee would require registration of all men from 21 to 30, inclusive, followed by a selective draft for a year's training.

The conscription bill probably will not come up in the house until the senate has acted, because its military committee is going to reopen its hearings.

Offensive Tactics Stressed.

OGDENSBURG, N. Y., Aug. 8.—(AP)—America's First Army, spurred by orders of its commanding officer, accelerated the tempo of Northern New York's gigantic training maneuvers today with an unprecedented emphasis on offensive tactics.

Instructed by Lieut. Gen. Hugh A. Drum that the main objective of the three and a half weeks of war games is to train the nearly 100,000 troops to be "offensive fighters" and "secure decision by offensive action," officers swung the smaller units into a program based on "carrying the fight to the enemy."

Arsenals on Full Time

WASHINGTON, Aug. 8.—(AP)—Orders went out from the war department today to place six army arsenals on a three-shift, day-and night operating schedule in order to increase production of guns and ammunition at least 65 per cent.

Officials said the three-shift plan, effective Aug. 10, would make possible the employment of more than 8,000 additional skilled mechanics and possibly 16,000 semi-skilled and unskilled workers.

New Anti-Aircraft Gun Mount

CHEHALIS, Wash., Aug. 8.—(AP)—Development of a new anti-aircraft machine gun mount, costing only $9.80, which might revolutionize defense tactics, was disclosed here today by the army during its current gigantic maneuvers in southwest Washington.

The new device permits the mounting of 50 caliber anti-aircraft machine guns on any type of truck, thus making it possible for the army to commandeer whole fleets of commercial vehicles at a moment's notice and send them over the countryside to fire at planes.

The mount was developed by the 65th Coast Artillery Anti-Aircraft Regiment.

Standardizing Tank Models

WASHINGTON, Aug. 8.—(AP)—Secretary Morgenthau disclosed today that British veterans of the "Flanders pocket" are helping adapt American military tanks to modern war developments.

He said the first British expert here on a tank-purchase mission was Brigadier General D. H. Pratt, who commanded a fleet of 100 tanks in northeastern Fance and Belgium before the Nazi war machine forced their bomb-ridden evacuation from Dunkerque.

Morgenthau explained the British were trying to buy tanks here, but it was not feasible for manufacturers to build one type for the United States and another for the British. So the British decided to pool their experience with American designs so as to produce standardized types that both countries could use.

Many RFC Defense Commitments

WASHINGTON, Aug. 8.—(AP)—Jesse Jones, federal loan administrator, told the house banking committee today the reconstruction finance corporation had agreed recently to finance construction of "half a dozen" new aircraft factories to cost between $150,000,000 and $200,000,000.

Jones made the disclosure while testifying on a bill to authorize a $500,000,000 expansion of the export-import bank's lending capital, partly to finance loans to Central and South American countries.

Jones said the RFC had committed itself to loans totalling about $700,000,000 under the defense program, including projects for acquisition of strategic materials as well as construction of new ordnance and munitions plants.

Such commitments, Jones explained, reduced the RFC's capital available for other purposes and added he did not believe it good policy to permit the agency to continue with curtailed capitalization.

Pilot Saved Town

LONDON, Aug. 8.—(AP)—Heroism of a British pilot who crased to his death in the sea in a blazing plane saved a southeast coast town from a disaster today.

The pilot remained at his controls to avert what appeared to be an inevitable crash into buildings of the town. As a result of his guidance, the plane fell in the water 50 yards from shore.

German Naval Base Bombed.

LONDON, Aug. 8.—(AP)—The air ministry announced tonight that Royal Air Force bombers carried out an hour-long raid through mist and low flying clouds on Kiel, big German naval base, last night and started a "series of explosions" in the dockyards.

Cherbourg, German - occupied French port, also was attacked in daylight by the British raiders.

The bombers, which slipped through low scudding clouds over Kiel, spotted their targets through gaps in the mist, a supplement to the air ministry communique said, and looses their explosives.

They encountered continuous fire from ground defenses, but all returned safely.

At one time some of the bombers became so covered with ice they were unable to climb, the bulletin said, and one pilot had to dump his bombs in the North Sea.

All lights on the airdrome at Holtenau in northwest Germany, which the British also visited, were put out after a salvo of bombs was dropped, the air ministry said.

At Hasum, another airdrome near Kiel, bombs were dropped on the landing ground.

News of County Home Demonstration Clubs

Bazette 4-H Club.

The Bazette 4-H club met Friday, August 2, in the home of our sponsor, Miss Velma Pohl.

We had several visitors, Miss Rosa Jennings, Miss Penny Purifoy and her mother, Miss Mary Jones and the hostess' mother and grandmother.

The sponsor and her helper, Mrs. Roy Pohl, entertained the guests with several games. When 5:30 came they served watermelon. Everyone had a nice time—Reporter.

STEWARDESS

(Continued From Page One)

ship's baggage compartment. She had bruises on the head and body and hospital officials described her condition as serious.

City Sales Manager Paul Stanley of American Air Lines interviewed the girl this morning but declined to make any statement for publication.

Another airline official said however, that they were inclined to believe Miss Griffith was holding the key in her mouth, possibly while changing her uniform, and that when the ship passed through rough air the jolt caused her to swallow the key and fall and bruise herself.

Examination of the mail compartment of the plane showed its contents had not been tampered with.

Pursuing possibilities the key had been swallowed deliberately to avoid having it fall into other hands, however, the ladies lounge, in which passengers found the stewardess shortly before the plane reached here, was examined for fingerprints.

Reports the Federal Bureau of Investigation had entered the investigation could not be confirmed today although last night. Tom Phelps, policeman at the airport, said he had been notified to meet FBI agents who would arrive and examine the plane today.

DALLAS, Aug. 8.—(AP)—The mid-air injury of Stewardess Rosemary Griffith of the American Airliner "Plainsman" shortly before it landed at Nashville, Tenn., last night was still unexplained after Superintendent Chester Borum of the Nashville airport accompanied nine passengers of the flight here today.

Borum theorized that a jolt, occasioned by a thunderstorm, may have caused Miss Griffith to fall in the baggage compartment.

"Passengers to whom I talked said the plane was jerked about considerably before the storm was left behind," Borum said.

Hospital attaches at Nashville said x-ray pictures revealed Miss Griffith had swallowed a key, supposedly the key to the compartment.

Borum said it was his belief that the stewardness was holding the key in her mouth and "the sudden shock made her swallow it."

Rips in the stewardess' clothing may have been caused when she was jolted against sharp-edged hinges on the compartment door, Borum said. He added that "of course, there are other things that could have happened."

Borum said passengers had not noticed Miss Griffith's absence until the cabin's temperature began mounting as they neared Nashville.

"Someone asked the pilot to turn down the heat," Borum said. "A few minutes later a woman passenger went to the rest room that adjoins the baggage compartment. Miss Griffith was lying on the floor unconscious."

Two passengers sitting near the compartment said they had heard or seen nothing to link with Miss Griffith's injury.

"None of the 15 aboard the plane—12 men and three women—were aware that anything was wrong until Miss Griffith was found," Borum added.

No statement had been given by Miss Griffith, still in a Nashville hospital.

NASHVILLE, Tenn., Aug. 8.—(AP)—Federal authorities, local police and officials of American Airlines delved today into mysterious circumstances surrounding the injury to a 24-year-old stewardess found unconscious aboard one of the company's trans-continental sky sleepers shortly before it landed here last night.

The girl, Miss Rosemary Griffith of New York City, was found by passengers of the west-bound plane unconscious in the baggage compartment of the ship. She was taken to a hospital in a hysterical condition.

Attaches of the hospital said X-rays disclosed she had swallowed a small key. Before this disclosure investigating officers had conducted a thorough search for the luggage room key, which they said the stewardess had in her possession.

She was reported to be suffering from body and head abrasions, which hospital authorities said were not serious.

The ship on which the incident occurred was kept on the ground, but passengers who desired to continue their trips were transferred to another plane for the west.

Airline officials said no clues had been discovered which would throw light on the manner in which the girl was injured. They said her condition would not permit questioning.

U. S. Deputy Marshall Glen Nelson said an unidentified passenger told him the stewardess' absence was noticed by passengers when the temperature in the plane was not regulated.

"I revived her a bit," Nelson quoted the passenger, "and she leaned over and whispered something to one of the pilots. She was very much in a daze."

NO AGE LIMITATION IN CERTAIN CASES IN SECURITY PROGRAM

WIDOWS WITH DEPENDENT CHILDREN DO NOT HAVE TO BE 65 YEARS OF AGE

Widows of workers who were covered by the Federal old-age and survivors insurance program, if they have dependent children, do not have to be 65 years old in order to get monthly benefit payments under the program, Knox Banner, acting manager of the Social Security Board, Waco field office, pointed out today.

Mr. Banner said that a number of young widows of insured workers, who have dependent children under 18, have not filed applications because of a misunderstanding of age requirements.

"The age-65 requirement applies to some types of claims, but not to widows with dependent children," Mr. Banner explained. "Should a worker die, leaving a widow with young, dependent children, the widow's age is immaterial. She and the children would be eligible for payments if her husband had earned wages of at least $50 in each of six calendar quarters during the three-years before his death.

"The amount a widow and her children receive will depend on the worker's average monthly wage," Mr. Banner stated. "This determines the benefit to which the worker would have been entitled. The widow receives three-fourths of the worker's insurance benefit, and each child under 18 is entitled to one-half." There are, of course, limits to what one family may receive; generally the family total for a widow with three or more children comes to twice the worker's benefit.

Age 65 is one of the requirements for eligibility in the case of retired workers themselves. If the wife of the retired worker is also 65 or more, she too is eligible for a monthly payment, equal to one-half of her husband's. When the worker dies, the widow may be entitled to three-fourths of the benefit the husband received.

FRIDAY, AUGUST 16, BE CORSICANA DAY AT RODEO IN WACO

WACO, Aug. 8.—(Spl.)—Friday, August 16, has been designated as Navarro, Limestone and Freestone county day at the annual Bear Club rodeo in Waco, according to Ralph Wolf, manager. The rodeo starts Tuesday, August 13 and continues through Saturday, August 17.

Sections of the grandstand will be reserved for each county delegation on this date and each group will be recognized during the performance.

The site of the rodeo this year is east of the Waco municipal stadium, and the seating capacity has been increased to 9,000, Wolf said. Central Texas rodeo fans will be assured of good seats, he added.

The feature cowboys of the country will be seen in action. Prize money in all events is greater than during any season in the past. Top event winners will receive a gold-lettered belt buckle with a cowboy riding a bear. Stuck from the penitentiary at Huntsville will be used in the various events. Only night performances will be given this year.

The opening parade will be held on Tuesday, August 13, in which county delegations of central Texas will be asked to take part.

HEALTH, BEAUTY AND POISE

By VERONICA DENGEL

FROM THE MAIL BAG

S. T. writes: Will you please tell me how to get rid of 'parentheses around the mouth.' Massage does not seem to help. The corners of my mouth seem to be drawn down which gives the appearance of a continuous frown.

Veronica Dengel

Massage should really help you—if it is done right. Short upward and outward strokes—rather across the line—is the right direction. Keep it up until a good circulation is worked up—and use lots of rich lubricating cream. But if you do not watch your posture and facial expressions during the day—all the massage work of the night before will be undone! Hold your head high, seem to press it back a bit on the shoulders, with the chin up, though. Practise yawning to relax the tension around the mouth—because this tenseness is the real cause. Practise the vowels—open the mouth for oos; and ohs; and ahs; and iehs;—no eehs! But open wide and drop the jaw. Watch yourself in repose that you do not tighten the mouth line. Such mannerisms, after years of daily repetition, show their marks in our expressions, and the lines on our face. Go about correcting the cause, keep up your light stroking massage; and I think you will show a gradual change.

L. Z. writes: Some time ago, I plucked out one or two noticeable hairs from my chin. Since then, it seems that more and more hair grows there which necessitates my plucking them out. I rather wish I did not have to have them removed with the electric needle, and wonder if there is any other way of removing them permanently. I have ten hairs on the right of my chin, and five on the left. I counted them! I do hope you can help me, for I do hate the thought of going through life with this problem continually before me.

The one and only safe, permanent method of removing hair is the electric needle; and you might just as well get it over with—both the hair and the problem will disappear in two treatments! It is not at all painful—just a tiny pin prick, is all that you will feel. Stop being a 'fraidy cat' and get it done this week.

A. O. H. writes: Could you give me a more definite idea how the 'Squaddle' is done? I want to reduce my hips quickly.

The 'squaddle' is simply walking around while in a squatting position. From a stooping, or squatting position, arms on hips or at shoulders, walk around the room forwards—and then when you are 'good,' backwards. It is a pull on the thigh muscles and will help you to reduce the thighs and hips, too. Practice rolling on the floor from side to side, knee drawn up on the chest. You will notice the pressure on the fatty section of the hips as you roll on it—somewhat like a massage.

WELL BRACED AND ANCHORED CORNER POSTS NECESSARY

COLLEGE STATION, Aug. 8.—(Spl.)—Well braced and anchored corner posts are to a fence what a good foundation is to a building.

If the end posts of a line of fence are not well braced so that the wire can be stretched tight much of the efficiency of the fence is lost.

Where wires run to a deadman buried at least eight feet back of a corner post will not be in the way, this method of anchoring a corner post is recommended by M. R. Bentley, agricultural engineer of the Texas A. and M. Extension Service.

The most important thing is to anchor a post so that it will not rise. A cross bar 16 to 24 inches long, nailed to the bottom of the post on the side opposite to the brace, will keep the post from rising vertically. Another cross bar near the surface will give greater bearing surface on the post.

Tests have shown that it is better to anchor a corner post down with a cross bar than to depend on the weight of an extremely heavy post or a rough post with rocks packed around it.

Bentley said the most common error found in bracing posts is that the braces are not long enough. These should be nine feet or longer, and of 4 by 4 inch treated lumber or that equivalent in strength and durability in other material.

The most effective braces slope from near the top of the corner post down to near the ground on the brace post.

TRAGEDY OF SOUR CREAM MAY BE MADE INTO REAL TRIUMPH

COLLEGE STATION, Aug. 8.—(Spl.)—The tragedy of sour cream may be turned into a triumph if it is used in a baked fish dish, or for baked veal chops or cutlets, or for gravy.

Nora Ellen Elliott, foods preparation specialist of the Texas A. and M. College Extension Service, comes up with this argument:

Fish and veal are often seasoned with lemon and butter. The acid of soured cream corresponds to the lemon and the cream supplies the fat.

The method is to season the fish with salt and put it in a very hot oven for about five minutes. Then add sour cream to cover, sprinkle with bread crumbs, and bake at a moderate temperature until the fish is tender and the crumbs are brown.

Veal chops and cutlets are first pan-broiled and then baked in the sour cream.

And Miss Elliott points out that sour cream makes a gravy that goes extra well with chicken, chipped beef, and such vegetables as fried tomatoes, snap beans and spinach.

Accident Fatal to Prison Farm Head

HOUSTON, Aug. 8.—(AP)—Captain A. N. Owen, 58, in charge of the Harlem state prison farm near Sugarland, died in a hospital here at 6:40 today, 30 minutes after the automobile in which he was riding alone was in collision with a heavy moving van on the Houston-San Antonio highway.

The collision occurred two miles this side of Missouri City, just inside Harris county.

The driver of the van was uninjured.

"Beverage Board" Is Introduced By National WCTU

CHICAGO, Aug. 8.—(AP)—The Woman's Christian Temperance Union introduced the "beverage board" today as a handy gadget for the nation's drinkers of non-alcoholic liquids.

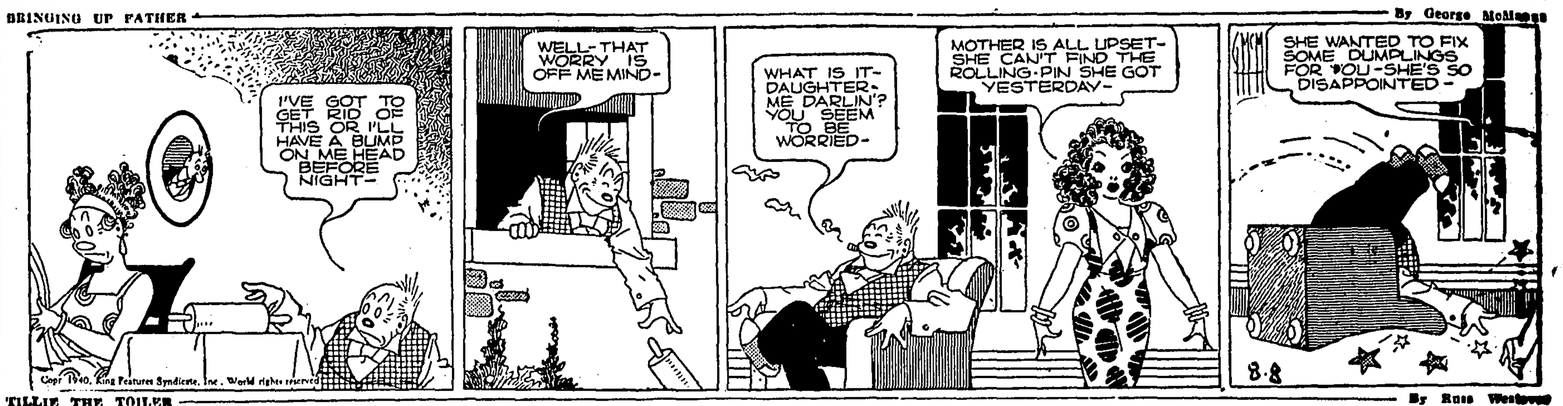

It's simply a board covered with gaily-colored oilcloth and set on legs, with an oilcloth "hoop skirt" hiding the ice bucket and jugs of fruit or berry juices. Its equipment of glasses, cups, straws, napkins and pitchers should be in matching colors.

Mrs. Blanch Pennington of Huntingdon, Pa., director of the W. C. T. U. non-alcoholic fruit products department, said the contrivance shouldn't be mistaken for a portable cocktail bar.

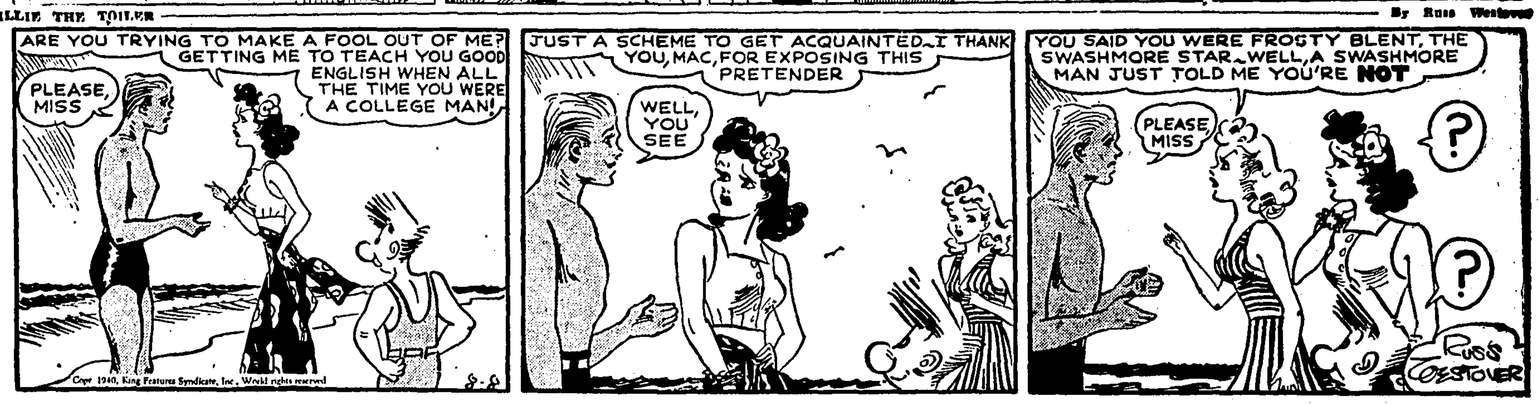

"No, indeed," she said, "it is not a bar; it must not be called a bar. It is a beverage board."

TRADERS FAILED TO BECOME INTERESTED IN MARKET TODAY

By VICTOR EUBANK

NEW YORK, Aug. 8.—(AP)—Most traders again held on to their cash in today's stock market and left leaders to rustle for themselves in exceptionally narrow territory.

Definite trends were lacking and about the best that could be said for the list, as a whole, was that it never encountered any real selling.

Transfers ran to around 200,000 shares.

Brokers virtually were unanimous in assigning the blame for the lengthy market stalemate to the European war. Favorable business items, including dividends and earnings, were without particular influence.

Mildly resistant shares included U. S. Steel, General Motors, Chrysler, Santa Fe, Great Northern, United Aircraft, Sperry, Glenn Martin, Sears Roebuck, American Can, Standard Oil of N. J., Eastman Kodak and Allied Chemical.

Minus rising animation were Bethlehem, Southern Railway, Anaconda, Kennecott, U. S. Rubber, Douglas Aircraft, Westinghouse, Union Carbide and Consolidated Edison.

URGED THAT STATE SCHOOL HEAD SHALL BE MADE APPOINTIVE

AUSTIN, Aug. 8.—(AP)—A subcommittee of a 168-member general committee of school administrators today urged that the state superintendent of public instruction be appointed by the state board of education instead of elected by the voters.

In a preliminary report, subject to review at a final meeting of the general committee tomorrow, the group recommended that the superintendent serve a six-year term at a salary of $6,000 to $10,000.

The superintendent now serves two year elective terms at an annual salary of $5,000.

Dr. A. W. Birdwell, president of Stephen F. Austin Teachers' college, expressed the opinion the change could be made "without serious friction" and would "promote a more effective educational machinery."

Legislative action would be necessary to make the superintendent's office appointive. The recommendation was one of several considered by seven subcommittees of the schoolmen named last year by Governor W. Lee O'Daniel and charged with recommending legislation to improve the public school system.

A subgroup which made a preliminary report on teacher certification was instructed by the general committee to bring in a recommendation requiring valid teachers from all instructors in state supported schools.

Victoria Electrical Expansion Predicted

WASHINGTON, Aug. 8.—(AP)—Early expansion of the Victoria, Texas, Electric Cooperative with the aid of the Rural Electrification Administration was predicted by Gene Houchins, attorney for the cooperative.

After conferring with Representative Mansfield (D-Texas) and REA officials, Houchins predicted the governmental agency would allocate approximately $100,000 to the cooperative in the next few weeks to be used in extending its power lines and building an office building in Victoria.

He said construction of 100 miles of new lines, in Victoria, Calhoun and Goliad was contemplated.

HURRICANE

(Continued From Page One)

out after killing at least one person and injuring ten others, none seriously. Everywhere old timers marvelled that there was no greater loss of life, and from all hands came stories of narrow escapes.

Mason Jones, a gulf refinery clerk at Port Arthur, crouched inside a large steel pump casting while a brick building caved in around him. He escaped injury. An automobile parked outside was wrecked.

Damage in Port Arthur was unofficially estimated at $500,000, chiefly to business buildings, docks and shipping. Many small boats were lost. Jefferson County Agent J. F. Comb said damage to the rice crop may reach $500,000.

Chinaman Drowned

The body of Chen Tung Sing, a Chinese, was found in Bayou Barataria at Crown Point, La.

R. F. Miller, 24, a lineman, was knocked unconscious at New Orleans by a 4,000-volt wire while repairing a line atop a 40-foot pole. His safety belt kept him from falling.

Twenty-two persons on fishing parties out of Morgan City, La., were reported safe.

The center of the storm passed inland between Sabine Pass and Port Arthur and winds at the peak registered more than 80 miles an hour.

Twenty men and five women were marooned at Black Bayou near Orange. Telephone lines were down.

Cecil Smith, Shell oil company boat pilot, reported today the marooned residents of the oil camp at Black Bayou were safe, but that wind damaged their houses considerably at the peak of the blow.

The United States Weather Bureau at New Orleans ordered storm warnings down at midnight and said it would issue no further advisories on the storm.

Danger from high tides passed at Port Arthur when the wind died to a 36-mile southerly squall. The Houston Weather Bureau said the storm apparently spent itself in thee sparsely settled section west and northwest of Port Arthur.

The storm loosed heavy rains in western Louisiana. At Lake Charles early in the morning a rainfall of 6.40 inches was recorded and the rain was still coming down in sheets. The rain did not extend far east of the storm area, however.

Southwest Louisiana Flooded.

CROWLEY, La., Aug. 8.—(AP)—An all-night rain which trailed the Gulf hurricane today flooded southwest Louisiana, marooning thousands of persons and temporarily paralyzing business.

Water stood several feet deep in portions of Crowley, LaFayette, Kaplan and other nearby cities, disrupting traffic routes and halting communications.

Residents in lower sections of the cities where the water had risen to more than five feet took refuge in courthouses and other public buildings where dry clothing was supplied and food was furnished.

A sufficiency of food was reported and no immediate suffering was in prospect, Crowley reports said. Doctors and physicians were taking necessary precautions to prevent typhoid fever.

High winds accompanying the excessive precipitation caused considerable minor damage in the cities and throughout the area but no casualties had been reported. Trees were uprooted in LaFayette and power lines and telephones were seriously affected.

Corporation Court.

One charge of intoxication and disturbing the peace, one of disturbing the peace, and one of intoxication brought offenders into the Corsicana Corporation Court Thursday morning.

Three juveniles were arrested for fighting in the business section of the city Wednesday afternoon and cited before Judge Chris L. Knox.

House Acts on Refugee Ships

WASHINGTON, Aug. 8.—(AP)—The house has voted to let American ships bring refugee children from war-torn nation to the United States,, but the senate yet to act.

The measure would authorize transportation of youngsters under 16 on unarmed, convoyed American ships, provided safe conduct was assured by belligerent nations.

Courthouse News

District Court

A temporary injunction was granted Monday by Wayne R. Howell, district judge, for Harvey B. McAllister against E. C. Street, et al, restaining and enjoining the proposed sale of 85 acres of the Joseph West survey. A hearing on the injunction was set for Sept. 9, 1940.

Arguments in the case of Frank Alexander, et ux., vs. Mrs P. D. Fullwood, et al, trespass to try title and damages, scheduled for Wednesday, were postponed until Friday as one attorney was unable to be present.

The jury commission composed of Walter Hayes of Corsicana, Curtis Patterson of Frost and Charles E. Reese of Kerens completed its work Tuesday in selecting petit and grand jury lists for the October term of court.

The July term of the district court will be ended Saturday night and the court will be in vacation until the first Monday in October when the October term will begin with the empanelling of a grand jury.

Commissioners' Court.

The regular meeting of the commissioners' court will be held Monday morning.

School Superintendent's Office.

Hearings of protests on scholastic transfers were conducted Tuesday by the Navarro county school board in connection with its regular monthly meeting.

Sheriff's Office.

Marion Moss was named in burglary and auto theft complaints filed before Judge Pat Geraughty and Ollie Busbee was named in a receiving and concealing stolen property complaint filed in Judge Geraughty's court.

Hiney Kinnon was charged in a complaint for receiving and concealing stolen property before Judge A. E. Foster Wedesday morning. These complaints were accepted by the criminal district attorney's department in connection with the widespread investigation of a series of burglaries and auto thefts in this section by the Navarro, Limestone and Freestone county officers.

One man was arrested Tuesday in connection with the alleged theft of $27 from the cash register of the Davis Grocery store at Purdon.

A negro was arrested on a misdemeanor theft charge Tuesday.

Hiney Kinnon, charged here with receiving and concealing stolen property, made bond Wednesday in the sum of $1,500 to await the action of the grand jury.

Constable's Office.

A 2-year-old cream-colored Jersey heifer was stolen last night from the premises of W. S Baumbarten, near the Cowhead road, according to a report early Wednesday.

Officers were advised that the animal was led down the railroad right-of-way after eight wires on the pen had been cut and then was apparently loaded on a pick-up truck. Another cow in the pen was not molested, officers said.

Oil and Gas Lease.

Rev. R. Otis Sory And Mrs. Sory Back From Mount Sequoyah

Rev. R. Otis Sory, district superintendent of the Corsicana District of Methodism, and Mrs. Sory have returned from a two weeks' visit to Mount Sequoyah, Methodist camp, at Fayettsville, Ark.

They both took courses and received diplomas in "Christian Education," which is the highest award in the Christian education training course.

Rev. Mr. Sory will hold two quarterly conferences Sunday, one at McCord, Black Hills circuit. Ray Copeland, pastor, and at night at Purdon.

Atlantic City Mayor On War Path Against Criminals That City

ATLANTIC CITY, N. J., Aug. 8.—(AP)—With the city jail already crowded, police continued to scour the town today for every man they could find with a "known criminal record."

The search was instituted by gun-totin' Mayor Tom Taggart, who told the cops he wanted every "undesirable" chased out of town or put in jail.

Eighty policemen roared applause last night when Taggart promised them that "henceforward nobody shall interfere with any of you in the performance of your duties."

"Investigation," said the mayor, "shows that men with police records have been moving in and out of the city unmolested, and I intend to put a stop to it."

NEGRO

(Continued From Page One)

me to make no noise," said the woman.

The negro attacked her, she told Lieut. L. D. Hooker of the homicide squad, then took $26 from a purse on the dresser and left the house by the rear door.

The woman's 5-year old daughter, sleeping in an adjoining room was not awakened.

About 2:25 a. m. cruising patrolmen, L. F. Tritico and P. H. Kelly saw the negro and arrested him for investigation.

Shortly after the negro had been booked at the station the woman appeared to report the attack and robbery. The suspect was brought into the room and she identified him as her assailant.

The negro at first denied he had been in the woman's home, but later signed a written confession, admitting his guilt, according to Lieutenant Hooker.

The W. P. Snow Family Moving to Oklahoma to Reside

Mr. and Mrs. W. P. Snow and family who have made their home in this city the past eleven years, Mr. Snow having been superintendent of the Southland Cotton Oil Co., have moved to Oklahoma City to make their home. Mr. Snow has assumed the superintendency of an oil mill there.

Their daughter, Mrs. Hazel Bowlin, who is bookkeeper and stenographer for the Buie Implement Co., is remaining in Corsicana and is making her home with Mrs. L. F. McPherson.

Mr. and Mrs. Snow made a large circle of friends during their stay, who deeply regret having to part with them, and wish for them all success and happiness in their Oklahoma City home.

Storm Warning.

NEW ORLEANS, Aug. 8.—(AP)—The United States weather bureau today issued the following storm bulletin, timed 10:40 a. m., Central Standard time:

"Although the tropical disturbance now central north of Port Arthur, Texas, will continue to diminish in intensity strongwinds to southerly gales and occasional squalls will prevail offshore from the West Louisiana and extreme Southeast Texas coast this afternoon and early tonight.

"Marine interests should be advised accordingly and small craft warnings displayed in Galveston, Port Arthur and Lake Charles districts."

FORMATION OF HOME GUARD OF VETERANS GATHERS HEADWAY

WOULD FORM STATE UNITS TO REPLACE GUARDSMEN CALLED TO SERVICE

By JACK BELL

WASHINGTON, Aug. 7.—(AP)—A movement to form a "home guard" composed primarily of World War veterans gathered headway in congress today as the senate approached a vote on the bill permitting the President to order the National Guard into *active training.*

Chairman Sheppard (D-Tex) asked the senate military committee to begin work Friday on legislation authorizing formation of state militia units to replace guardsmen called into federal service.

The measure, he told reporters, probably will follow generally plans outlined yesterday by President Roosevelt at a Hyde Park press conference.

Mr. Roosevelt said the organizations probably would be built around a nucleus of trained men furnished by the American Legion and the Veterans of Foreign Wars.

Whether the federal government would be called on to furnish equipment and to aid in training the groups is a question to be settled, Sheppard said.

Senate debate on the National Guard bill was interrupted yesterday by a fiery argument between Senators Holt (D-W. Va.) and Minton (D-Ind.) in which the words "liar" and "slacker" were shouted, but leaders set a time limit on speeches in order to get a vote late today.

Would Clear Way for Conscription

Passage of the measure would clear the way for opening debate tomorrow on the Burke-Wadsworth conscription bill.

Senator Burke (D-Neb) said he though the real test would come on a substitute submitted by Senator Maloney (D-Conn.).

Maloney would delay a selective draft until attempts had been made to obtain sufficient manpower through voluntary enlistments.

Minton precipitated the heated exchange when he arose to shout, after Holt had attacked the conscription bill, that he was "getting impatient with being lectured by a slacker family."

Holt dubbed "malicious lies" Minton's charges that Holt's father had opposed sending food to the soldiers in France in the World War and Minton's assertion that Holt's brother had been "hidden away" in South America at that time to avoid the draft.

Later, in a radio address, Holt charged that attempts had been made to "smear" him in order to break his opposition to the Burke-Wadsworth bill.

Haifa Bombed Again.

ROME, Aug. 8.—(AP)—Italy's third bombardment of Haifa, British outlet to the Mosul oilfields, resulted in destruction of 100,000 tons of oil yesterday, Italian dispatches declared today.

INDIA

(Continued From Page One)

er contribution of Indian wealth and manpower to Britain's war effort.

With unstinted Indian aid, Britain might be in position to assemble overwhelming manpower to smother Italian expansion in the Mediterranean and Red Sea areas, and at the same time offer a check to a threatening Japan in the other direction.

Italy Seeking Vantage Point.

By her advances through British Somaliland. Italy is seeking to reach a vantage point looking toward this eastern and middle eastern empire, much of which is dominated by Moslems.

While repeating the government's offer of dominion status for India's 350,000,000 people, the statement reiterated unwillingness to undertake "fundamental constitutional issues" in the midst of war and held off devising of a new framework of government until after the war—a delay which has been criticised by ardent nationalists in India.

On another point, however, the government gave assent to the setting up, after the war, "with the least possible delay" of a body "representative of the principal elements in Indian national life in order to devise the framework of the new constitution x x x."

The government promised "every aid in their power" in this task.

"India's anxiety at this moment of critical importance in the world struggle against tyranny and aggression to contribute fully to the common cause and to the triumph of our common ideals is manifest," the statement said.

"She has already made a mighty contribution. She is anxious to make a greater contribution still. His Majesty's government in Great Britain are concerned that that unity of national purpose in India which would enable her to do so should be achieved at as early a date as possible.

Summer Drought Broken.

TOPEKA, Kas., Aug. 8.—(AP)—Old-fashioned gulley-washers smashed the summer drought in the erstwhile "dust bowl" area today, bringing precipitation up to 4.66 inches at Tribune.

To the Voters Of Navarro County

KERENS, Texas, Aug. 7, 1940.—The Corsicana Daily Sun and its entire staff, to the First National Bank of Corsicana, and to all the Election Judges of the 48 Voting Boxes, I want to take this method to express to you my heart-felt gratitude for your support and help down through the years as I tried to serve you as County Chairman. I have just completed my fifth race for this office, every time but one I was opposed, and each time you have honored me by supporting me for County Chairman. The records will show that not one time did I mention my opponent, but conducted my race on my own merits and on a platform of service to every candidate and every voter in Navarro County. I have never bothered the voters or the Precinct Chairman during any of my races, but have worked hand in hand with them so that every election would be legal and without one word of criticism. Your loyalty to me shall be a life long possession, and a great source of comfort to me in the future when I shall have lost my usefulness on account of age. Each election year adds to my gratitude for each of you for your trust, confidence and honor placed upon me. It definitely proves that friendship is too big a thing for a measure. There has been brought to my attention some remarks about my Stewardship as your County Chairman, and my answer to this is in the itemized statement of every dollar received and paid out as your County Chairman. This itemized statement is open for the inspection of any honest voter. "Die hards" and snoopers are not included. Again thanking you for your support, your many favors and kindness, and assuring you of my ever lasting vigilance for honest and fair elections - - -

Yours truly,
N. S. CRAWFORD.

UPWARD TREND OF BUSINESS DURING JULY CONTINUED

GAIN WAS MODERATE, HOWEVER, COMPARED WITH THE JUNE ADVANCE

WASHINGTON, Aug. 8.—(AP)—Business continued to improve in July, Secretary of Commerce Hopkins said today, but he described the gain as "moderate, compared with the sharp rise in June."

The general situation, he said, "is well supported at this time by a large volume of unfilled orders and active consumer purchasing."

"Although inventories are not much below the peak to which they were pushed in March by last fall's buying wave," he added, "there is no further accumulation of any significance taking place in total holdings at this time."

Failure of commodity and security prices to respond to the increased volume of trade was traced by Hopkins to the "international political and military situation." He reported a downward trend in prices of "sensitive commodities."

But the status of prices is not due to "any fundamental weakness in domestic economic conditions," he said, "and it is no sign that business recovery is running out."

"Any expansion of employment and income resulting from the national defense program will push per capita consumption to new record levels," Hopkins observed.

GERMAN

(Continued From Page One)

age." Fires in a suburb of Essen and at Datteln were reported to have been extinguished quickly. Two British planes were reported shot down.

The Germans said one of their submarines sank three armed enemy merchant ships of over 16,000 tons.

Says Britain Should Feed People

BERLIN, Aug. 8.—(AP)—Britain is responsible for feeding the populations in countries occupied by German troops because she is responsible for their entering the war against Germany, Dienst Aus Deutschland, authoritative commentary, observed today.

The article said it was written in reply to British press assertions that Germany was responsible for the care and feeding of persons in the occupied areas and that Adolf Hitler had declared in his last speech that "the feeding of Europe is assured."

"Hitler spoke not of an assured European but of an assured German supply," Dienst Aus Deutschland said.

Streets Named For Hitler.

BERLIN, Aug. 8.—(AP)—(By Radio)—If you were a Luxembourger living on Liberty Avenue before the Nazi invasion and you ran away in fear of your life and then came back, say about now, you'd find yourself living on Adolf Hitler street.

The German wireless announced the change in the name of the city's principal thoroughfare today.

Woodbine Test Bazette Section Is Announced

Rigging up operations were under way Wednesday for another Wildcat Woodbine test southeast of Bazette and drilling is slated to begin Monday, according to an announcement Wednesday morning.

The test will be drilled on a several hundred acre block by Butler and Calhoun Oil Company and W. E. McKinney, all of Corsicana, it was stated, with J. B. Daniel of Fairfield as the drilling contractor.

The location is on the T. L. James tract, R. D. Newman survey. It is about five miles southwest of the Bazette field developed near the Trinity river last year, and is 850 feet northwest of the old "Conner gasser" drilled several years ago by the Boyd Oil Company.

Surface casing will be set Saturday.

The Woodbine sands are expected to be encountered about the 3200-foot level.

PIONEER RESIDENT ZION'S REST DIED TUESDAY IN ATHENS

Mrs. Sarah E. Duncan, aged 85 years, native of the Zions Rest community and life-long resident of Navarro county and Corsicana, died Tuesday afternoon at Athens. She was stricken while visiting relatives.

Funeral services were held Wednesday afternoon at 3 o'clock from the Corley chapel. Burial was in Oakwood cemetery. The rites were conducted by Rev. A. A. Peacock, pastor of the Eleventh Avenue Methodist church.

Surviving are two daughters, Mrs. A. F. Hood, Athens, and Mrs. J. H. Roberts, Corsicana; a son, A. L. Duncan, Corsicana; two half-sisters, Mrs. J. O. Bell and Miss Tina Melton, both of Dallas, and several grandchildren and great-grandchildren.

Pallbearers were Jack Megarity, Fred Jeffers, Walter Hamilton, Gordon Collins, Percy Nowell and Jim Tayor.

New Tropical Storm.

NEW ORLEANS, Aug. 8.—(AP)—The United States weather bureau said today the Caribbean tropical storm was still of moderate intensity and was moving northward about 280 miles northeast of Nassau.

BUDGET

(Continued From Page One)

moves all power from local authorities.

Butler Presided.

Joe E. Butler, president of the Chamber of Commerce, presided at the meeting, and the purpose of the meeting was stated as being of service to the court and exercising the responsibilities of citizenship to such an extent that the maximum benefit could be secured from the expenditure of each tax dollar.

Among those attending the meeting were J. O. Sessions of Bazette, chairman of the county-wide group; E. L. McCluney and son of Kerens, Hugh Parrish of Emhouse, and Porter Johnson of Blooming Grove, all of the county group; Mr. Butler, J. N. Edens, chairman of the local group; C. L. Jester, John J. Bryant, County Auditor E. Y. Cunningham, and R. W. Knight.

The complete proposed county budget with comparative figures on last year were presented by the county auditor with the committees studying each item or group of items. Reductions in interest and sinking fund requirements and lowering of levies by districts were reported, and figures presented on the amount antisipated from the refund on road bonus. It was learned the bond levies in five districts could not be reduced this year. Total interest and sinking fund requirements were reported at $117,500 per year.

The auditor stated he had prepared his budget on a basis of a valuation of nineteen million dollars and on 80 per cent tax collections. A reduction of two cents in the levy for the jury fund and inclusion of the salary of the court reporter in this account was pointed out. It was also stated the budget had been prepared on a basis of commissioners' salaries being $157.50 per month, paid three months from the general fund and nine months from the road and bridge funds, although the possibility was pointed out that the reduction in values in the county might reduce the *monthly salaries to $150.*

Road, Bridge Fund.

In the road and bridge fund, revenues for last year were reported at $121,505.44, with budget totals for this year set at $116,000, and the available funds for Precincts 2, 3 and 4 approximately $2,000 under last year's amounts. It was stated no provision was made for purchase of new equipment since the county owned 27 pieces of motorized equipment.

A reduction from $68,590 to $61,850 in the general fund was also reported, and a deficit for this year of $17,000 noted. The budget included an item of $1,000 for installation of a cost accounting system in the county auditors' office, a similar amount for elections, and $1,000 for interest on borrowed money although the auditor stated the county hoped to be on a cash basis by the first of the year. No change was made in hospital appropriations and $5,000 was set up for this cause.

In the agriculture and livestock department a total of $4087 was set up to pay the county's portion of the salaries of the four agents, two white and two colored. The committee recommended the addition of $12.00 to this amount to care for the assistant to the white county agent.

In the discussion of the present state law covering salaries, it was estimated the new system was costing this county $5,000 to $6,000 annually over the former system in use.

Preparations were also made for efforts to have every portion of the county represented at the public hearing on the budget to be held next Friday, August 16.

Sun want ads bring results.

Grass Fire.

A grass fire in the 300 block on South Eighteenth street caused a run for the fire department about 1:35 Wednesday afternoon.

Police are investigating false alarm turned in at 12:30 p. m. Thursday from a downtown booth reporting an alleged blaze in the southwestern residential section of the city, fire department officials stated. No blaze was found.
